Beer Cooler

Mark # 801

MANUFACTURER Bally

MODEL # Per Plan

- FEATURES**
- Size and shape as shown on plan +7'-9" high; verify each site-adapted plan to detect any variations.
 - Install into slab depression 4" below finished floor level.
 - 16 Ga. NSF-approved floor finish.
 - Non-slip treadstrips on 6" centers in all walk areas.
 - Aluminized galvanized steel exterior.
 - White enameled interior walls and ceiling panels for reflectance.
 - One additional 100W shielded, incandescent ceiling-mounted light fixture.
 - 34" door with aluminum kickplate, door closer, and locking latch with inside release knob.

GENERAL DESIGN INFORMATION

Use this section of the Bally Working Data Catalog to find useful facts on Bally walk-in coolers, walk-in freezers and refrigerated buildings. You'll find details on urethane insulation, panel construction, the Speed-lok® joining system and other important aspects of our structures. Section 1 is focused on walk-ins. See Section 6 for information on refrigerated buildings exclusively.

Bally panels can be assembled to create superb insulated structures from warehouse to kitchen size.

SOLID FUNDAMENTALS: THE PRE-ENGINEERED PANEL

In making our panels, we take nothing for granted. We design and build our own heated molds, in which our panels are foamed-in-place precisely and accurately. The prime insulation built into those panels provides dimensional stability through a wide range of temperatures.

Standard Bally Panel
4", 5" or 6" thick
(Facing inside)

1. Outside skins are available in white polyester over smooth galvanized, white polyester or sand-tan polyester over embossed galvanized, embossed aluminum, embossed Galvalume® or stainless steel. Optional finishes in a spectrum of custom colors are also available, as are Sandex sand-textured finishes.
2. Bally wash primer for optimum foam adhesion.
3. Foamed-in-place urethane insulation, (poured, not frothed).
4. Tongues and grooves on panel edges are accurately molded urethane.
5. Cam-action Speed-lok joining mechanism for snug joints.
6. Heavy-gauge steel straps connect locking arms with locking pins on opposite edges of each panel.
7. Inside skins are available in white polyester over smooth or embossed galvanized, embossed aluminum, embossed Galvalume or stainless steel.
8. Interior metal floor panel skin. Heavy-gauge galvanized steel or optional stainless steel.
9. Exterior metal floor panel skin. Usually supplied in same finish as vertical panels. Edges capped with matching metal when stainless steel or white over galvanized steel are specified for verticals.

Type of Panel	Lengths	Widths	Heights/Comments †
Center Ceiling Panels	Vary **	11-1/2", 23", 34-1/2" or 46"*	—
End Ceiling Panels	Vary **	23-1/2"	—
Corner Panels	—	12" x 12" Outside width	6'10" thru 10'10", 11'4" thru 19'4", 19'8" thru 27'8" in one foot increments ††
Hinged Door Panels 4", 5" or 6"	—	46" Wide — 30" and 36" Opngs. 57-1/2" Wide — 36", 42", 48" Opngs. 69" Wide — 36", 42", 48" or 60" Opngs.	6'10", 7'10"; for taller buildings, panels of an appropriate size are installed above the door panel.
Wall Panels	—	11-1/2", 23", 34-1/2" or 46"**	6'10" thru 10'10", 11'4" thru 19'4", 19'8" thru 27'8" in one-foot increments.
Center Floor Panels	Vary **	11-1/2", 23", 34-1/2" or 46"**	—
End Floor Panels	Vary **	23-1/2"	—

* 17-1/4" wide panels available for special uses. Contact factory for details.

** Maximum length for 4" and 5" thick floor and ceiling panels is 11'6" for multi-span and 17'4" for single span (indoors).

Smallest building size is 3'11" w x 5'10" l, size increases in 11-1/2" increments to any size building. For height, see "wall panels" above.

† Heights shown are for vertical panels only, for overall height add thickness of appropriate floor and ceiling panels.

†† May be fabricated in two pieces.

HOW THE DIAPHRAGMATIC SYSTEM HELPS YOU

Because it's so easy to use, Bally's Speed-lok-based diaphragmatic joining system drastically cuts time and labor costs for most installations. Two inexperienced workers can assemble a 6' x 8' structure in three or four hours, a fraction of the time it would take to install a built-in unit of conventional construction — or other walk-in brands. And Bally structures are equally simple to enlarge or relocate.

To make a walk-in or refrigerated building larger, panels can be added to sides or ends of the building. Users can buy a building that fits current requirements, so no space is wasted. When growth demands a bigger building, the swift addition of extra panels completes the job. Should the need arise, a Bally structure can be disassembled and relocated with ease.

DEPEND ON BALLY'S FOAMED-IN-PLACE URETHANE INSULATION

In a time when the elimination of CFCs has severely curtailed the effectiveness of many insulations, Bally's poured-foam urethane remains an outstanding choice.

The current formulation used in our panels relies on HCFCs, meeting international standards for CFC reduction as well as the U.S. Clean Air Act. Compared to the CFCs they replace, HCFCs reduce ozone depletion by a factor of ten. Yet they yield insulation with outstanding resistance to the transfer of heat — substantially more effective at resisting the transfer of heat than fiberglass, polystyrene or other common insulating materials.

You also get these important advantages when you choose Bally:

- **Dimensional stability** — Bally urethane maintains its shape and size through a wide range of temperatures.
- **Light weight** — Poured-foam urethane insulation makes Bally panels light in weight, so they're easy to handle.
- **Energy efficiency** — The insulating superiority of Bally urethane saves money. You'll pay less to cool your Bally structure.

Approvals and Listings

Some manufacturers' statements of product safety are nothing but empty claims. Bally backs what it says with approvals and listings from leading independent quality certification organizations. Buyers can be sure that Bally products live up to the maker's claims and their own standards.

Underwriters Laboratories

No independent testing organization is more respected than Underwriters Laboratories. The tag at right, showing UL-tested listings for flame spread and smoke developed, appears on every Bally panel. It proves that the panels are UL-classified — a vital assurance to every buyer.

Bally Refrigerated Boxes, Inc. Morehead City, N.C. 28557			
UNDERWRITERS LABORATORIES INC. CLASSIFIED 7/P19 BUILDING UNITS			
SURFACE BURNING CHARACTERISTICS			
4" Core	6" to 8" Thick	4" to 6" Thick Painted or Unpainted	
Material	Core Material	Steel or Aluminum Painted Panel	
Flame Spread	25	25	
Smoke Developed	170	300	Over 500

Classified in accordance with the 25-1975 of State of California Foamed Plastics Flammability Requirements.
Flame spread and smoke developed are based on tests conducted in accordance with the methods specified in the UL-970 and UL-910. These methods have been approved by the Underwriters Laboratories, Inc. and are not intended to be used for other purposes.
*Flame spread and smoke developed are based on tests conducted in accordance with the International Conference of Building Officials Research Committee Acceptance Criteria for Foamed Plastics under Section 1713.05 of the 1981 Uniform Building Code.

UL listings have also been granted to electrical systems in Bally structures, including interior lights, door heaters and refrigeration systems.

Factory Mutual

Bally panels have been approved as a Class 1 building material by Factory Mutual Insurance System, Norwood, Mass. This approval means that Bally wall and ceiling panels meet FM standards for walk-ins and refrigerated buildings without sprinklers.

New York City

Stringent tests on their urethane insulation have earned Bally walk-ins and refrigerated buildings the Materials and Equipment Approval of the City of New York. Also, to conform to the standards imposed by the city's Advisory Board, Bally makes available special wiring systems and a low-voltage heater.

National Sanitation Foundation

Approval of the National Sanitation Foundation is granted to Bally installations incorporating floor panels with a 3/8" coved offset.

Bally holds many more state and municipal code approvals. For details, contact our corporate headquarters in Morehead City, North Carolina.

FLOOR CONSTRUCTION — CONTINUED WALK-IN FLOORS — CONTINUED

Because requirements vary widely with individual site conditions and local construction regulations, design, review and approval of all such plans must be the responsibility of an engineer familiar with the circumstances of the individual installation.

Additional underfloor heating and venting may be required to prevent frost heaving of the floor, depending on size, temperature of application and location. See page three, this section. (Dimensions shown are for 4"-thick panels; if 5" or 6" panels are used, adapt drawings accordingly by adding 1" to inside of wall thickness.)

Bally floor panels on existing floor with concrete wearing floor (indoors or outdoors)

Bally floor panels on concrete pad (indoors or outdoors)

Built-in insulated floor (indoors or outdoors)

Built-in insulated floor (indoors only)

FLOOR CONSTRUCTION — CONTINUED DRAIN AND VENT PIPES

Because requirements vary widely with individual site conditions and local construction regulations, design, review and approval of all such plans must be the responsibility of an engineer familiar with the circumstances of the individual installation.

Walk-ins or refrigerated buildings operating at or below 32°F (0°C) must be equipped with some form of underfloor heating or ventilation to prevent ground water from freezing and heaving the floor. Perforated drain and vent piping with gravel fill is Bally's preferred recommendation; alternatives include glycol piping or resistance heating.

Drain and vent tiles are especially useful:

- a. When coolers or freezers are located in areas with high water tables. In such areas they drain off excess water and serve as air vents to keep the area under the slab dry.
- b. Generally when freezers or cooler-freezer combinations are more than 225 square feet in floor area and the ambient temperatures are higher than the ground temperature. These drain and vent pipes provide passages for the flow of warm air. This air flow stores heat in the ground to prevent ice build-up that could eventually cause the floor to heave.

No matter which subfloor treatment is chosen, it's vital that an engineer familiar with the circumstances of the individual installation be employed through the design and construction stages.

ASHRAE-recommended Subfloor Treatments with Drain and Vent Tiles

SPECIFICATIONS

TO USE THESE SPECS, SIMPLY CHECK OR WRITE IN THE APPLICABLE DETAILS IN EACH SECTION

1. Sectional walk-in refrigerators and/or freezers complete with doors shall be manufactured by Bally Refrigerated Boxes, Inc. Overall size of walk-in shall be _____ long x _____ wide x _____ high.

Fill in lengths and widths from this list: 5'10", 6'9-1/2", 7'9", 8'8-1/2", 9'8", 10'7-1/2", 11'7", 12'6-1/2", 13'6", 14'5-1/2", 15'5", 16'4-1/2", 17'4", 18'3-1/2", 19'3", 20'2-1/2", 21'2", 22'1-1/2", 23'1", 24'1/2", 25'0", 25'11-1/2", 26'11", 27'10-1/2".

Longer or wider buildings are available in additional 11-1/2" increments.

Fill in heights from this list (heights shown are with floor; subtract 4" for less-floor units): 7'6", 8'6", 9'6", 10'6", 12', 13', 14', 15', 16', 17', 18', 19', 20'4", 21'4", 22'4", 23'4", 24'4", 25'4", 26'4", 27'4", 28'4". (Single length verticals)

Taller buildings are available in additional 12" increments, with stacked vertical panels.

2. Foam core of panels shall be Underwriters Laboratories-listed as having flame spread of 25 or lower and smoke generation of 450 or lower when tested in accordance with ASTM E-84-76. Panels shall be approved by Factory Mutual as a Class I building type. They shall be foamed using HCFC expanding agents and shall meet all current international standards.
3. All work and materials shall be in full accordance with local and/or state ordinances, and with any other prevailing rules and regulations.
- Bally Refrigerated Boxes, Inc., is not responsible for furnishing items required by the regulations, unless specified or shown on the drawings or contained in the specifications.
4. Panels shall consist of interior and exterior metal skins precisely formed with steel dies and roll-form equipment and thoroughly checked with gauges for accuracy. The metal skins shall be placed into heated molds and liquid urethane injected between them. For extra rigidity, the exteriors of all vertical panels except corners and door panels shall have vertical grooves spaced on 5-3/4" centers. Urethane shall be foamed-in-place (poured, not frothed) and, when completely heat-cured, shall bind tenaciously to the metal skins to form an insulated panel. Panels shall contain 100 percent urethane insulation and have no internal wood or structural members between the skins. To insure tight joints, panel edges must have foamed-in-place tongues and grooves with a flexible vinyl gasket on the interior and exterior of all tongue edges. Gaskets shall be resistant to damage from oil,

fats, water and detergents and must be NSF-approved. Panel thickness: 4" _____ 5" _____ 6" _____

5. Exterior Finish

- A. _____ Stucco-embossed Galvalume® steel
B. _____ Smooth galvanized steel with white polyester painted finish
C. _____ Stainless steel
D. _____ Stucco-embossed aluminum
E. _____ Stucco-embossed aluminum with white polyester painted finish
F. _____ Stucco-embossed galvanized steel with sand-tan polyester painted finish
G. _____ Stucco-embossed galvanized steel with white polyester painted finish
H. _____ Kynar over steel
I. _____ Sandex stone-textured finish over steel

6. Interior Finish

- A. _____ Stucco-embossed Galvalume steel
B. _____ Smooth galvanized steel with white polyester painted finish
C. _____ Stainless steel
D. _____ Stucco-embossed aluminum
E. _____ Stucco-embossed aluminum with white polyester painted finish
F. _____ Stucco-embossed galvanized steel with sand-tan polyester painted finish
G. _____ Stucco-embossed galvanized steel with white polyester painted finish

7. All panels except corner panels shall be made in 23" and 46" widths, fully interchangeable for fast, easy assembly. Panels 11-1/2", 17-1/4" or 34-1/2" wide are to be furnished only if required to fit the allocated space. To assure perfect alignment and maximum strength, corner panels shall employ a right-angle configuration with exterior horizontal dimensions of 12" on each side. Vertical panels (except corner panels) shall be supplied in a single length up to 28' high (16' high for installations with aluminum or stainless steel finish). For outdoor applications, single-height panels greater than 19' (16' for aluminum) or multi-tiered vertical panels must be secured to horizontal girts mounted between building columns.

8. Panels shall be equipped with Bally Speed-lok diaphragmatic joining devices. The distance between locks shall not exceed 46". Each device shall consist of a cam-action, hooked locking arm placed in one panel, and a steel rod positioned in the adjoining panel, so that when the arm is rotated, the hook engages the rod and draws the panels tightly together with cam action. Arms and rods shall be housed in individual steel pockets. Pockets on one side of the panel shall be connected to pockets

SPECIFICATIONS — CONTINUED

on the other side in width, by the use of 2"-wide metal straps set into and completely surrounded by the insulation. When panels are joined together, these straps shall form lock-to-lock connections for extra strength.

9. Floor Construction — Bally furnishes floor panels only. All construction and preparation for Bally floor panels must be provided by others. Floor panel construction shall be similar to that described in sections 7 and 8 above, but with a heavier-gauge interior skin; thickness of floor panels may be different than that of vertical panels. 4"-thick floor panels can be NSF or non-NSF. 5"- and 6"-thick panels are non-NSF.

A. _____ Light-usage Floor — Floor panels shall be placed on a concrete pad and leveled. Where inside floor and outside platform must be level, the concrete pad shall be made with a depression deep enough to receive the Bally floor panels.

B. _____ Heavy-usage Floor — Floor panels shall be placed on a depressed concrete pad and leveled. After supporting steel is assembled, a 4" reinforced concrete wearing floor shall be poured. The depression shall be deep enough to make interior and exterior finished floors the same height.

C. _____ Built-in, Insulated Floor — The floor shall be constructed on the job site. It shall consist of a depressed, reinforced concrete sub-slab. Slab urethane shall be built into this depressed slab and tile floor or 4" reinforced concrete wearing floor installed on top. Wall panels shall be fastened to this floor. Adequate drainage and ventilation or other heat source must be provided beneath and around all construction.

Floor Panel Finishes

A. _____ 14 ga. galvanized steel

B. _____ 16 ga. stainless steel

Special Construction Floor Panels

A. _____ Reinforced Floor Panels — 4"-thick insulated floor panels contain non-conductive structural imbeds for maximum strength without freezing. Standard steel plate overlay adds strength. Panels support up to 1200 pounds per square foot (evenly distributed) and support pallet jacks or light forklifts with total weight of up to 2000 pounds per wheel (diamond plate overlay required).

10. Hinged Entrance Door Panels

Number of doors _____

Width and height of each door _____

(Select dimensions from this list:)

Widths: 30" 36" 42" 48" 60"

Heights: 78" 84"

Number of doors, location and direction of swing is specified on the plans. Doors are infitting and flush-mounted.

Construction shall be as specified in 7.

Magnetic core, thermoplastic gaskets installed on the top edge and both sides of the door shall keep the door in a closed position, forming a tight seal; a flexible, dual-blade wiper gasket shall be installed at the bottom of the door. NSF-approved gaskets shall be replaceable and resistant to damage from oil, fats, water and detergent.

A heavy U-channel structural steel frame around the perimeter of the door opening shall prevent racking or twisting; steel frame is to be reinforced for hardware attachment.

Anti-condensate heater wire shall be concealed behind the metal edge of the door jambs. The door panel shall also include a vapor-proof interior lamp; junction box for 120v., 60 cycle, 1 phase, a.c. service (15 amp maximum); 2"-dia. flush-face dial thermometer (field mounted on 60" wide doors); and weather hoods for outdoor installations.

Hardware

A. _____ For doors with 30" or 36"-wide openings: two spring-loaded, self-closing hinges; cylinder latch with provision for padlocking and safety release mechanism; door closer.

B. _____ For doors with 42", 48" or 60"-wide openings: hinges are uplift type with blades not less than 9" long; latch shall include provision for padlocking and safety release mechanism.

Hardware Finishes

A. _____ For walk-ins finished with stainless steel — polished aluminum

B. _____ For walk-ins with finishes other than stainless steel — satin aluminum

C. _____ For walk-ins with any finish (if desired) — chrome-plated

Door Options

A. _____ Hinged Super Entrance Door — Construction is identical to that of a standard door except that a third hinge is added and the door and portion of door panel are protected by diamond-plate kick panels covering the bottom 32" on interior and exterior. Show number and size of super doors

(Check following options as desired.)

B. _____ Observation Window in Entrance Door — (a 14-1/2" x 24" heated observation window shall be

SPECIFICATIONS — CONTINUED

provided in the entrance door. It consists of three panes of glass with sealed air spaces between them. The window shall be supplied with heated glass and frame and unit shall be removable for replacement.)

C. Mortise Lock — Heavy-duty, dead-bolt lock with full safety release capabilities. Mortise lock installations shall also be provided with stainless steel pins engaging the door frame on the hinged side.

D. Strip Curtain — Sturdy, NSF-approved, clear-vinyl strip curtains shall permit easy passage while minimizing air infiltration.

11. Options — check as desired

A. Pressure Relief Port (required for all freezers)

B. Partition Walls — Insulated, 4"-thick metal-clad panels shall be provided to form separate compartments within the walk-in. A non-conductor strip must be built into all exterior panels at the joints where partitions butt to prevent transfer of heat from one compartment to another. Partition panels shall be Speed-Lok'ed to these panels. Construction shall be as specified in 7 above.

C. Roof Options — One of the following types must be used for any outdoor installation:

 Sectional prefab metal roof shall be used with structures installed outdoors on buildings of any length but not exceeding 34'7" in width. Roofs shall be made of stucco-embossed aluminum.

 Single-piece, presized membrane roof system; maximum dimensions: 34'7" x 34'7".

 Built-up type by others.

D. Alarm Systems

 Audio-Visual Alarm System

 Audio-Visual Alarm with digital temperature readout Hi set point only

 Audio-Visual Alarm with digital temperature readout Hi Low set point with dry contact

E. Double-swing Cart Door

F. Reach-in Doors for Product Loading (insulated solid type)

Insert correct sizes: 18-1/2" x 30" or 30" x 30"

(For multi-compartment units, provide plan view with compartment temperatures.)

13. Warranties

Bally shall warrant that any part of the structure it supplies (except the refrigeration system and its related accessories) is free from defects in materials or workmanship under normal use and service. The insulated panel portion of the structure is warranted free from defects under normal use and service for a period of 10 years from date of installation (but in no event shall the warranty be in force for more than 10 years and 6 months from the date the product was first shipped by Bally). Panel surface condition is warranted free from defects under normal use and service for one year from installation, provided the panel is stored and installed according to Bally's instructions. Mechanical (including hardware, gasketing, Speed-lok assemblies, aluminum weather roofs) and electrical components, except refrigeration systems (which are covered by a separate warranty) are warranted to be free from defects under normal use and service for one year from date of installation. (In no case shall this portion of the warranty be in force for more than one year and six months from the date the product was first shipped by Bally.) The warranty shall not include any labor charges for replacement or repair of defective parts or refrigeration. Full warranty information is to be provided with the walk-in.

Refrigeration System +35°F - Coil

Mark # 802

MANUFACTURER Bohn

MODEL # Per Plan

FEATURES

- Set to maintain +35°F in cooler section of cabinet.
- Assemble complete operating system per General Specifications.
- Building sleeves for installation of refrigerant lines shall be provided by G.C.

† For EC motors, use 60 Hz capacity and airflow values (Units with EC motors operating at 50 Hz will not see a reduction in performance due to the electronic control of the motor)

Refrigeration System +35°F - Compressor

Mark # 803

MANUFACTURER Copeland

MODEL # Per Plan

- FEATURES**
- Build up condensing unit per General Specifications.
 - Set to maintain +35°F in cooler section of cabinet.
 - Assemble complete operating system per General Specifications.
 - Building sleeves for installation of refrigerant lines shall be provided by G.C.
 - Compressor remote location as specified by A/E; plan reference is schematic.

Notes:

Capacities are rated at 65°F return gas and 5°F subcooling.

The unit model numbers above denote construction with fan guards and bx conduit. The second digit of the model number will change on units ordered without either.

Pressures are listed in PSIG (#) and reflect suction pressure at the compressor inlet. Temperatures shown are the corresponding saturation temperatures. Saturation conditions at the evaporator will be higher due to pressure drop in suction line.

Pressure control (if supplied) with E-line units extends 2" beyond the base on 1/2 H.P. units. It is located on the crankcase end of the compressor.

"Elec" code is a part of the model number.

"M/C amps" is minimum circuit ampacity value developed for U.L. This value has a calculated safety factor and can be used for wire sizing.

For remote applications, additional receiver capacity may be necessary to assure adequate pumpdown capacity.

Amp data for CAV models is shown for the highest current condition which is at 208 volt.

All three phase models use single phase fan motors.

Operating voltage range . . . plus 10%, minus 10% including 208/230 volt (187 to 253 volt)

Contact Copeland for data on models rated for 50 hertz.

HD SUPER™ BEER KEG HANDLING RACKS

- **Holds Kegs, Half- and Quarter-Barrels and Cases:** Beer-keg handling racks are designed to make handling of kegs, half- and quarter-barrels and cases easier and more efficient.
- **Increase Storage Capacity:** These racks can double storage capacity without changing the size of the cooler by making use of "air rights" around the perimeter of the cooler, as well as in the interior.
- **Facilitate Inventory and Stock Rotation:** Beer-keg handling racks provide a neat, orderly way to store kegs for easier inventory and stock rotation.
- **Easier Access to Kegs:** By permitting neater, more orderly storage, these racks allow easier access to kegs for tapping/untapping, restocking, etc.
- **Increase Sales Potential:** By allowing for the storage of more inventory and the handling of more brands, sales potential is increased
- **Ideal for Series Hook-Ups:** Two or three kegs of the same brand can be tapped in a series.
- **Strong and Rugged:** Beer-keg handling racks are constructed of sturdy HD Super™ components, with 1⁵/₈" diameter posts and a patented split-sleeve assembly device. They're made to withstand the heavy load of full kegs and the repeated impact of being loaded and unloaded.
- **NSF Listed**

HD SUPER™ BEER-KEG HANDLING RACKS

Additional Features

- **Style A:** Provides storage for kegs/barrels on two levels, utilizing either two dunnage shelves or the floor and one dunnage shelf.
- **Style B:** Provides storage for kegs/barrels and case beer on three levels, one dunnage and two solid shelves.
- **Style C:** Provides storage for kegs/barrels and case beer on three levels, utilizing the floor and one dunnage shelf for kegs/barrels and one solid shelf for cases.

All models which have upper level storage of kegs/barrels are provided with a retaining cable for safety.

All models are provided with 2⁵/₁₆" diameter foot plates for stability and easy leveling. Optional 3¹/₂" diameter stainless steel foot plates are available as accessories.

*D= dunnage shelf; S= solid shelf; all shelves are 18" (455mm) wide.

Accessories

Units with standard foot plate adjacent to a wall should be secured with **Wall Mounting Brackets** which engage either the frame of a dunnage shelf or three-sided frame in any unit (as shown in photo).
Cat. No. 9984HZ

Units with standard foot plate adjacent to each other should be buttressed end-to-end or back-to-back by using **Post Clamps** to join paired posts.
Cat. No. 9994HZ

Freestanding units (not adjacent to a wall or to another unit) should be stabilized with accessory **3¹/₂" Foot Plates**, which provide a broader base for each post and are drilled for securing to the floor.
Cat. No. 9993HS

Item # _____

Job _____

SUPER ADJUSTABLE SUPER ERECTA SHELF® WIRE SHELVING

Super Adjustable Super Erecta Wire Shelving is the most advanced and innovative wire storage system available. A unique Corner Release System and SiteSelect™ Posts make changing shelf levels fast and easy, without tools! And Super Adjustable Shelving works in conjunction with the entire Super Erecta System of shelves and accessories.

- **Easily Adjustable:** Unique Corner Release and SiteSelect Posts create a total system that offers "Tool-Free," fast adjustment at 1" (25mm) intervals along the entire height of the posts.
- **Easily Assembled:** The Corner Release System and SiteSelect Posts, combined with the original "bottom up" assembly process, creates a complete shelving system in minutes, without tools! SiteSelect Posts with the double-groove visual guide feature, have circular grooves at 1" (25mm) intervals and are numbered at 2" (50mm) intervals. Shelves simply seat into place using the Corner Release.
- **Unique Shelf Design:** The open wire design of these heavy-gauge shelves minimizes dust accumulation and allows a free circulation of air, greater visibility of stored items and greater light penetration. Shelf ribs run front to back allowing you to slide items on and off easily. Shelves can be loaded and unloaded from all sides. This open construction allows use of maximum storage space of cube.
- **Unique Post Design:** New SiteSelect post design provides a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves. Bolt leveler on post bottom compensates for uneven surfaces.
- **Fast, Easy Reconfiguration:** Super Adjustable Super Erecta can change as quickly as your needs change. By using various accessories, hundreds of shelving configurations become possible.
- **Choice of Finishes:** Super Adjustable Super Erecta Wire Shelving is available in a variety of finishes: Super Erecta Brite and chrome-plated for dry storage, Metroseal 3™ with antimicrobial product protection, and stainless steel for corrosive environments, and a large array of designer colors (see Catalog Sheet 10.14A).

*MICROBAN and the MICROBAN symbol are registered trademarks of the Microban Products Company, Huntersville, NC.

96 5/8	2454	5 1/2	2.5	**96P		

*Height includes leveling bolt and cap.

**96P should not be used in units less than 24" (610mm) deep. Consult Metro Engineering for alternate recommendations.

Post lengths to be specified as cut to a round number, ie: 74P cut to 69"... This will result in an overall post height with adjustment of 69 5/8" to 69 7/8".

Important: When ordering by components remember that for maximum stability, units should be kept as wide and low as possible.

FEATURES:

One piece **Deep Drawn** sink bowl design.

All sink bowls have a large liberal radii with a minimum dimension of 2" and are rectangular in design for increased capacity.

CONSTRUCTION:

All TIG welded.

Welded areas blended to match adjacent surfaces and to a satin finish.

Die formed Countertop Edge with a 3/8" No-Drip offset.

One sheet of stainless steel is used. There are no welded seams other than corners.

MECHANICAL:

Faucet supply is 1/2" IPS male thread hot and cold.

K-59 splash mounted 4" O.C. gooseneck faucet chrome plated furnished with aerator.

K-6 stainless steel basket drain 1-1/2" IPS.

K-26 lever operated drain and built-in overflow with plastic overflow tube and spring clamps.

7-PS-14 P-Trap is 1 1/2" chrome plated.

7-PS-12 Soap Dispenser.

Towel dispenser with hinged towel box. Unit uses standard C-fold towels.

Sink bowl is 10" x 14" x 5".

MATERIAL:

Heavy gauge type 304 series stainless steel.

Wall mounting bracket is Galvanized and of offset design.

All fittings are brass / nickel plated unless otherwise indicated.

Slim Jim® Container

Combine efficiency and ease of handling with the 23 gallon Rubbermaid Slim Jim® Container, now available with optional handles. Positioned high on the container, the large handles are easy to grasp and help give improved leverage and control for lifting and emptying. For smaller volume requirements or where full container lifting weight is a concern, choose the 15.9 gallon Slim Jim® Container. Interchangeable, color-coded Recycling Tops fit both container sizes and help encourage effective waste separation. An innovative linking trolley system can be used to transport multiple Slim Jim® containers in one trip or individually as a dolly.

Make your operation productive and efficient with the Slim Jim® Containers, Tops and Trolley System—the strongest link in your waste separation program!

Color-coded tops encourage effective separation of recyclable waste: blue top with slot for paper, green and brown tops with holes for bottles and cans, gray and yellow tops for general refuse.

Containers come in two capacities for versatility to fit your needs.

Linking trolleys detach easily by pushing front toeplate.

Large handles positioned high on the Slim Jim® container give leverage and control.

Durable, lightweight plastic construction provides long life without the weight, sharp edges and rusting common with some metal containers.

Slim Jim® Container

Item No.	Description	Dimensions	Capacity	Polyliner Bags	Color	Pack

Durable, heavy-duty containers for a variety of uses.

- ☐ All-plastic, professional-grade construction will not rust, chip or peel; resists dents.
- ☐ Strong, snap-on lids are available for secure, stable stacking.
- ☐ Reinforced rims add strength and durability.
- ☐ Built-in handles allow easy, non-slip lifting and anti-jam nesting.
- ☐ Double-ribbed base increases stability and dragging capacity.
- ☐ Gray, White and Yellow are USDA Meat & Poultry Equipment Group Listed and assist in complying with HACCP guidelines.
- ☐ Certified to NSF Standard #2 (gray, white and yellow) and Standard #21(all colors)
- ☐ Custom imprinting available; contact Rubbermaid Customer Service at (800) 347-9800 for details.
- ☐ 2637-88 is California State Fire Marshal (CSFM) approved for fire safety when used with 2632.

SECURITY UNITS

Features:

- **Safe Storage:** Protects valuable materials and sensitive items from loss or pilferage.
- **Microban® Antimicrobial Product Protection*:** Metroseal 3 and MetroMax Q models feature Microban Antimicrobial Product Protection, designed to stay “cleaner between cleanings.”
- **Ready View of Contents:** Heavy-gauge open wire construction keeps the entire contents of the truck visible at all times, making it easy to check inventory.
- **Adjustable, Optional Intermediate Shelves:** Patented, easily adjustable shelf designs — Super Adjustable Super Erecta, MetroMax Q, and qwikSLOT — allow flexibility to meet changing needs. Can be positioned in 1" (25 mm) increments along the entire height of post.
- **Patented, Ergonomic, 1/4-Turn Door Handle:** Makes opening and closing the unit easier than conventional security unit designs.
- **Double Door:** Each door opens 270 degrees and can be secured along the sides of the unit.
- **Time Saving Assembly:** Metro security units assemble quickly — right out of the box.
- **Shipped Knocked-Down:** Saves on freight costs. Easily assembled.

Choose from Stationary or Mobile Standard and Heavy-Duty Configurations:

- **Safe Transportation:** Mobile, security trucks provide the advantage of quick, protective transportation.
- **Easy Cleaning of Storage Areas:** Mobile units move easily from walls to allow thorough cleaning of floors and walls.
- **Mobile Units:** Available in Standard and Heavy-Duty models. Heavy-Duty units offer increased rigidity and durability for applications such as crossing thresholds.
- **Stationary Units:** Posts have leveling feet to compensate for uneven surfaces.

Super Erecta Shelf (HD Mobile) with optional Super Adjustable Super Erecta® Intermediate shelves

MetroMax Q (Stationary) with optional Intermediate shelves

quwikSLOT (Mobile) with optional Intermediate shelves

Casters: 5MP and 5MPB (with locking brake) feature a polyurethane tread.

5PC and 5PCB (with locking brake) castes feature a polymer horn and resist rusting. They are recommended for high-moisture environments.

Heavy-Duty Models: feature aluminum dollies with wraparound bumpers and 5" (127mm) diameter casters.

EV9324-01

Insurice Single-I 2000 System

Delivers premium quality water for ice applications

Insurice Single-I 2000 System: EV9324-01

I 2000 Replacement Cartridge: EV9612-21

BENEFITS

Reduces water-related ice machine problems caused by scale build-up from dirt and dissolved minerals

Reduces chlorine taste and odor and other offensive contaminants

Self-contained scale inhibitor feed keeps ice machines functioning at full capacity

Reduces maintenance and service costs by reducing scale and clogging of distribution lines, evaporator plate and pump

Precoat submicron technology reduces dirt and particles as small as 1/2 micron in size

Reduces possible health contaminants such as asbestos fibers and Cryptosporidium and Giardia cysts

Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

NSF Certified under NSF/ANSI Standards 42 and 53

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating

Never use saddle valve for connection

Use 3/8" water line

Do not connect system to water-cooled condenser

Install vertically with cartridges hanging down and allow 2-1/2" clearance below the cartridge for easy cartridge replacement

Flush cartridges by running water through system for five minutes at full flow

OPERATION TIPS

Change cartridges on a regular 6 month preventative maintenance program

Change cartridges when capacity is reached or when pressure falls below 10 psi

Service flow rate must not exceed 1.67 gpm

Always flush the filter cartridge at time of installation and cartridge change

APPLICATION/SIZING

For ice machine applications

Most cubers up to 750 lbs./day

Most flakers up to 1,500 lbs./day

Insurice Single-I 2000 System

SPECIFICATIONS

Overall Dimensions:

29"H x 7"W x 7"D

Inlet connection: 3/8"

Outlet connection: 3/8"

Service Flow Rate:

Maximum 1.67 gpm (6.3 Lpm)

Pressure Requirements:

10 - 125 psi (0.7 - 8.6 bar), non-shock

Temperature: 35 - 100°F (2 - 38°C)

No electrical connection required

Shipping Weight: 6 lbs.

Operating Weight: 9 lbs.

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.

WARRANTY

Everpure water treatment systems (excluding replaceable elements) are covered by a limited warranty against defects in material and workmanship for a period of five years after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Everpure will provide a copy of the warranty upon request.

System Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of:

Standard No. 42: Aesthetic Effects
Chemical Unit
Taste and Odor Reduction
Chlorine Reduction
Mechanical Filtration Unit
Particulate Reduction, Class I:
99.9+% reduction of particles
one-half micron and larger in size
Standard No. 53: Health Effects
Mechanical Filtration Unit
Turbidity Reduction
Cyst Reduction
Asbestos Reduction

Indigo™ Series 450 Ice Cube Machine

Model: ID-0452A IY-0454A ID-0453W IY-0455W

Indigo Series i-450
Ice Machine on B-400 Bin

Designed for operators who know that ice is critical to their business, the Indigo™ Series ice machine's preventative diagnostics continually monitor itself for reliable ice production. Improvements in cleanability and programmability make your ice machine easy to own and less expensive to operate.

- **Space-Saving Design** – Up to 450 lbs. (204 kgs.) daily ice production and only 30" (76.20 cm) wide.
- **Intelligent Diagnostics** – provide 24 hour preventative maintenance and diagnostic feedback for trouble free operation.
- **Acoustical Ice Sensing Probe** – for reliable operation in challenging water conditions.
- **EasyRead Display** – communicates operating status, cleaning reminders, and asset information through a blue illuminated display.
- **Programmable Ice Production** – by On/Off Time, Ice Volume or Bin Level (with accessory bin level control) further improves energy efficiency and savings.
- **Easy to Clean Foodzone** – Hinged front door swings out for easy access. Removable water-trough, distribution tube, curtain, and sensing probes for fast and efficient cleaning. Select components made with AlphaSan® antimicrobial.
- **DuraTech™ Exterior** – provides superior corrosion resistance. Stainless finish with innovative clear-coat resists fingerprints and dirt.
- Available **LuminIce™ Growth Inhibitor** controls the growth of bacteria and yeast within the foodzone.

Ice Machine Electric

115/60/1 standard.
(208-230/60/1 and 230/50/1 also available)

Minimum circuit ampacity:

LXGeR SHORT advansys GLASSWASHER

701 S Ridge Avenue, Troy, OH 45374
1-888-4HOBART • www.hobartcorp.com

WARNING

Do not premix other chemicals and sodium hypochlorite (liquid bleach). Mixing may cause hazardous gas to form.

NOTICE

Required flowing water pressure to the dishmachine is 15-65 PSIG. If pressures higher than 65 PSIG are present, a pressure regulating valve must be installed in the water line to the dishmachine (by others).

Pressure gauge not required on pumped rinse machines.

Important: The chemical containers should be placed no higher than 16" above floor. If chemical containers are to be placed in cabinet adjacent to machine, a 1/2" dia. hole is required in the cabinet to run chemical supply line.

Notes:

- All vertical machine dimensions taken from floor may be increased by .875" or decreased by .375".
- Moist air escapes from the door. Use only moisture resistant materials adjacent to dishmachine sides and top.
- A vent hood is not recommended above the undercounter dishmachine since it does not produce excessive vapors.

Plumbing notes:

- Water hammer arrestor (meeting ASSE-1010 Standard or equivalent) to be supplied (by others) in common water supply line at service connection.
- Recommended water hardness to be 3 grains or less for best results.
- If drain hose is looped above a sink, the loop must not exceed 44" AFF.

CONNECTION INFORMATION (AFF = ABOVE FINISHED FLOOR)

LEGEND

E1 ELECTRICAL CONNECTION: 1-3/8" DIA. HOLE FOR 1" TRADE SIZE CONDUIT; 10-5/8" AFF.

P1 SINGLE FILL AND RINSE CONNECTION: 3/4" FEMALE GARDEN HOSE FITTING ON 6' LONG HOSE SUPPLIED WITH MACHINE.; 55-85°F (COLD) RECOMMENDED FOR LXGeR.

P2 DRAIN CONNECTION: 5/8" BARB FITTING WITH 6' LONG HOSE SUPPLIED WITH MACHINE.

WARNING

Electrical and grounding connections must comply with the applicable portions of the National Electrical Code and/or other local electrical codes.

Plumbing connections must comply with applicable sanitary, safety and plumbing codes. Drain and fill line configurations vary, some methods are shown on this drawing.

LXGeR and LXGePR advansys GLASSWASHER

701 S Ridge Avenue, Troy, OH 45374
1-888-4HOBART • www.hobartcorp.com

SPECIFICATIONS

DESIGN: Front opening, equipped for installation in either freestanding or undercounter-type operations.

CONSTRUCTION: 300 series stainless steel tank, door and top panel.

PUMP: Centrifugal-type, integral with motor, horizontally mounted. Pump capacity 38 gpm.

MOTOR: Single phase, furnished for all electrical specifications. Factory sealed lubrication. Inherent overload protection with auto reset.

WASH AND RINSE CYCLE: Complete automatic type, controlled by solid-state electronics. Cycle may be interrupted any time by opening door. Cycle continues when door is closed.

- Initial cycle fills wash tank, to be recirculated each wash cycle. Some wash water is drained off before rinse cycle. Rinse cycle refreshes wash water and tank heat.

RINSE PUMP: Powered by a single phase motor, the rinse pump is made of high strength engineered composite material.

BLOWER: The blower is a 60mm x 300mm tangential wheel powered by a 2-pole single phase motor for quiet and reliable operation, LXGeR only.

CONDENSER COIL: The condensing system uses a tube and fin coil constructed of copper and corrosion resistant aluminum. The condenser coil allows for energy recovery from waste heat in the moisture laden air that would normally escape into the environment after a dishwashing cycle, LXGeR only.

RINSE AND SANITATION:

- **LXGeR:** Sanitation is accomplished by means of a built-in booster heater designed to raise temperature of water to a minimum of 180°F from an incoming water temperature of 55°F.

- **LXGePR:** Sanitation is accomplished by injection of proper amount of sodium hypochlorite solution (liquid bleach) into final rinse water to achieve a minimum of 50PPM sanitizing solution. Injection of sodium hypochlorite is accomplished by a built-in sanitizing chemical pump. Minimum required hot water temperature is 120°F.
 - Potable water rinse to remove chemical residue.
 - To be used with sanitizer approved for use with post sanitizing rinse
- **CHECK SANITIZER CONCENTRATION:** PuriRinse must be off (hold Wash button for 5 seconds). Verify that there is sufficient chemical supply. Run cycle and use test strips on wetted surface of glasses after cycle is complete. If concentration is below minimum required, contact your local Hobart Service office.

ENERGY RECOVERY: Heat energy is recovered from the condensation of vapors in the chamber at the end of each cycle. This pre-heats the water for the next rinse cycle from 55°F up to 140°F.

PUMPED DRAIN: Machine automatically drains water through a built-in pump. Maximum 38" drain height permitted.

ELECTRIC BOOSTER HEATER: 4.9 KW electric booster with Sense-A-Temp™ technology adequately sized to raise 55°F inlet water to 180°F, with the aid of the energy recovery system.

RACKING: Machines accommodate racks from 10" x 20" to 20" x 20".

NOTE: Certain materials, including silver, aluminum and pewter are attacked by Sodium Hypochlorite solution in the chemical sanitizing mode of operation.

SPECIFICATIONS: Listed by Underwriters Laboratories Inc. and NSF International.

Single cover stored when not in use.

Dual cover stored when not in use.

- Heavy duty 18 ga. stainless steel construction for strength and security.
- Perlick-exclusive design includes convenient, built-in storage solution.
- For speed rails longer than 48", the locking covers consist of 2 sections for easy handling.
- Locking cover kits include cover, brackets, hardware and padlocks. *Speed rails sold separately.
- For field installed add R suffix.

Walk-In Cooler

Mark # 841

MANUFACTURER Bally

MODEL # Per Plan

- FEATURES**
- Size and shape as shown on plan +7'-9" high; verify each site-adapted plan to detect any variations.
 - Install into slab depression 4" below finished floor level.
 - 16 Ga. NSF-approved floor finish.
 - Non-slip treadstrips on 6" centers in all walk areas.
 - Aluminized galvanized steel exterior.
 - White enameled interior walls and ceiling panels for reflectance.
 - One additional 100W shielded, incandescent ceiling-mounted light fixture.
 - 34" door with aluminum kickplate, door closer, and locking latch with inside release knob.

GENERAL DESIGN INFORMATION

Use this section of the Bally Working Data Catalog to find useful facts on Bally walk-in coolers, walk-in freezers and refrigerated buildings. You'll find details on urethane insulation, panel construction, the Speed-lok® joining system and other important aspects of our structures. Section 1 is focused on walk-ins. See Section 6 for information on refrigerated buildings exclusively.

Bally panels can be assembled to create superb insulated structures from warehouse to kitchen size.

SOLID FUNDAMENTALS: THE PRE-ENGINEERED PANEL

In making our panels, we take nothing for granted. We design and build our own heated molds, in which our panels are foamed-in-place precisely and accurately. The prime insulation built into those panels provides dimensional stability through a wide range of temperatures.

Standard Bally Panel
4", 5" or 6" thick
(Facing inside)

1. Outside skins are available in white polyester over smooth galvanized, white polyester or sand-tan polyester over embossed galvanized, embossed aluminum, embossed Galvalume® or stainless steel. Optional finishes in a spectrum of custom colors are also available, as are Sandex sand-textured finishes.
2. Bally wash primer for optimum foam adhesion.
3. Foamed-in-place urethane insulation, (poured, not frothed).
4. Tongues and grooves on panel edges are accurately molded urethane.
5. Cam-action Speed-lok joining mechanism for snug joints.
6. Heavy-gauge steel straps connect locking arms with locking pins on opposite edges of each panel.
7. Inside skins are available in white polyester over smooth or embossed galvanized, embossed aluminum, embossed Galvalume or stainless steel.
8. Interior metal floor panel skin. Heavy-gauge galvanized steel or optional stainless steel.
9. Exterior metal floor panel skin. Usually supplied in same finish as vertical panels. Edges capped with matching metal when stainless steel or white over galvanized steel are specified for verticals.

Type of Panel	Lengths	Widths	Heights/Comments †
Center Ceiling Panels	Vary **	11-1/2", 23", 34-1/2" or 46"*	—
End Ceiling Panels	Vary **	23-1/2"	—
Corner Panels	—	12" x 12" Outside width	6'10" thru 10'10", 11'4" thru 19'4", 19'8" thru 27'8" in one foot increments ††
Hinged Door Panels 4", 5" or 6"	—	46" Wide — 30" and 36" Opngs. 57-1/2" Wide — 36", 42", 48" Opngs. 69" Wide — 36", 42", 48" or 60" Opngs.	6'10", 7'10"; for taller buildings, panels of an appropriate size are installed above the door panel.
Wall Panels	—	11-1/2", 23", 34-1/2" or 46"**	6'10" thru 10'10", 11'4" thru 19'4", 19'8" thru 27'8" in one-foot increments.
Center Floor Panels	Vary **	11-1/2", 23", 34-1/2" or 46"**	—
End Floor Panels	Vary **	23-1/2"	—

* 17-1/4" wide panels available for special uses. Contact factory for details.

** Maximum length for 4" and 5" thick floor and ceiling panels is 11'6" for multi-span and 17'4" for single span (indoors).

Smallest building size is 3'11" w x 5'10" l, size increases in 11-1/2" increments to any size building. For height, see "wall panels" above.

† Heights shown are for vertical panels only, for overall height add thickness of appropriate floor and ceiling panels.

†† May be fabricated in two pieces.

HOW THE DIAPHRAGMATIC SYSTEM HELPS YOU

Because it's so easy to use, Bally's Speed-lok-based diaphragmatic joining system drastically cuts time and labor costs for most installations. Two inexperienced workers can assemble a 6' x 8' structure in three or four hours, a fraction of the time it would take to install a built-in unit of conventional construction — or other walk-in brands. And Bally structures are equally simple to enlarge or relocate.

To make a walk-in or refrigerated building larger, panels can be added to sides or ends of the building. Users can buy a building that fits current requirements, so no space is wasted. When growth demands a bigger building, the swift addition of extra panels completes the job. Should the need arise, a Bally structure can be disassembled and relocated with ease.

DEPEND ON BALLY'S FOAMED-IN-PLACE URETHANE INSULATION

In a time when the elimination of CFCs has severely curtailed the effectiveness of many insulations, Bally's poured-foam urethane remains an outstanding choice.

The current formulation used in our panels relies on HCFCs, meeting international standards for CFC reduction as well as the U.S. Clean Air Act. Compared to the CFCs they replace, HCFCs reduce ozone depletion by a factor of ten. Yet they yield insulation with outstanding resistance to the transfer of heat — substantially more effective at resisting the transfer of heat than fiberglass, polystyrene or other common insulating materials.

You also get these important advantages when you choose Bally:

- **Dimensional stability** — Bally urethane maintains its shape and size through a wide range of temperatures.
- **Light weight** — Poured-foam urethane insulation makes Bally panels light in weight, so they're easy to handle.
- **Energy efficiency** — The insulating superiority of Bally urethane saves money. You'll pay less to cool your Bally structure.

Approvals and Listings

Some manufacturers' statements of product safety are nothing but empty claims. Bally backs what it says with approvals and listings from leading independent quality certification organizations. Buyers can be sure that Bally products live up to the maker's claims and their own standards.

Underwriters Laboratories

No independent testing organization is more respected than Underwriters Laboratories. The tag at right, showing UL-tested listings for flame spread and smoke developed, appears on every Bally panel. It proves that the panels are UL-classified — a vital assurance to every buyer.

Bally Refrigerated Boxes, Inc. Morehead City, N.C. 28557			
UNDERWRITERS LABORATORIES INC. CLASSIFIED 7/P19 BUILDING UNITS			
SURFACE BURNING CHARACTERISTICS			
4" Core	6" to 8" Thick	4" to 6" Thick Painted or Unpainted	
Material	Core Material	Steel or Aluminum Painted Panel	
Flame Spread	25	25	
Smoke Developed	170	300	Over 500

Classified in accordance with Test 25.105 of State of California Foamed Plastics Flammability Requirements.
Flame spread and smoke developed are based on tests conducted in accordance with UL-713. This material has been tested by UL and is not intended to be used in any other application.
*Floor panels are tested in accordance with the International Conference of Building Officials Research Committee Acceptance Criteria for Foam Plastics under Section 1713.05 of the 1981 Uniform Building Code.

UL listings have also been granted to electrical systems in Bally structures, including interior lights, door heaters and refrigeration systems.

Factory Mutual

Bally panels have been approved as a Class 1 building material by Factory Mutual Insurance System, Norwood, Mass. This approval means that Bally wall and ceiling panels meet FM standards for walk-ins and refrigerated buildings without sprinklers.

New York City

Stringent tests on their urethane insulation have earned Bally walk-ins and refrigerated buildings the Materials and Equipment Approval of the City of New York. Also, to conform to the standards imposed by the city's Advisory Board, Bally makes available special wiring systems and a low-voltage heater.

National Sanitation Foundation

Approval of the National Sanitation Foundation is granted to Bally installations incorporating floor panels with a 3/8" coved offset.

Bally holds many more state and municipal code approvals. For details, contact our corporate headquarters in Morehead City, North Carolina.

FLOOR CONSTRUCTION — CONTINUED WALK-IN FLOORS — CONTINUED

Because requirements vary widely with individual site conditions and local construction regulations, design, review and approval of all such plans must be the responsibility of an engineer familiar with the circumstances of the individual installation.

Additional underfloor heating and venting may be required to prevent frost heaving of the floor, depending on size, temperature of application and location. See page three, this section. (Dimensions shown are for 4"-thick panels; if 5" or 6" panels are used, adapt drawings accordingly by adding 1" to inside of wall thickness.)

Bally floor panels on existing floor with concrete wearing floor (indoors or outdoors)

Bally floor panels on concrete pad (indoors or outdoors)

Built-in insulated floor (indoors or outdoors)

Built-in insulated floor (indoors only)

FLOOR CONSTRUCTION — CONTINUED DRAIN AND VENT PIPES

Because requirements vary widely with individual site conditions and local construction regulations, design, review and approval of all such plans must be the responsibility of an engineer familiar with the circumstances of the individual installation.

Walk-ins or refrigerated buildings operating at or below 32°F (0°C) must be equipped with some form of underfloor heating or ventilation to prevent ground water from freezing and heaving the floor. Perforated drain and vent piping with gravel fill is Bally's preferred recommendation; alternatives include glycol piping or resistance heating.

Drain and vent tiles are especially useful:

- When coolers or freezers are located in areas with high water tables. In such areas they drain off excess water and serve as air vents to keep the area under the slab dry.
- Generally when freezers or cooler-freezer combinations are more than 225 square feet in floor area and the ambient temperatures are higher than the ground temperature. These drain and vent pipes provide passages for the flow of warm air. This air flow stores heat in the ground to prevent ice build-up that could eventually cause the floor to heave.

No matter which subfloor treatment is chosen, it's vital that an engineer familiar with the circumstances of the individual installation be employed through the design and construction stages.

ASHRAE-recommended Subfloor Treatments with Drain and Vent Tiles

SPECIFICATIONS

TO USE THESE SPECS, SIMPLY CHECK OR WRITE IN THE APPLICABLE DETAILS IN EACH SECTION

1. Sectional walk-in refrigerators and/or freezers complete with doors shall be manufactured by Bally Refrigerated Boxes, Inc. Overall size of walk-in shall be _____ long x _____ wide x _____ high.

Fill in lengths and widths from this list: 5'10", 6'9-1/2", 7'9", 8'8-1/2", 9'8", 10'7-1/2", 11'7", 12'6-1/2", 13'6", 14'5-1/2", 15'5", 16'4-1/2", 17'4", 18'3-1/2", 19'3", 20'2-1/2", 21'2", 22'1-1/2", 23'1", 24'1/2", 25'0", 25'11-1/2", 26'11", 27'10-1/2".

Longer or wider buildings are available in additional 11-1/2" increments.

Fill in heights from this list (heights shown are with floor; subtract 4" for less-floor units): 7'6", 8'6", 9'6", 10'6", 12', 13', 14', 15', 16', 17', 18', 19', 20'4", 21'4", 22'4", 23'4", 24'4", 25'4", 26'4", 27'4", 28'4". (Single length verticals)

Taller buildings are available in additional 12" increments, with stacked vertical panels.

2. Foam core of panels shall be Underwriters Laboratories-listed as having flame spread of 25 or lower and smoke generation of 450 or lower when tested in accordance with ASTM E-84-76. Panels shall be approved by Factory Mutual as a Class I building type. They shall be foamed using HCFC expanding agents and shall meet all current international standards.
3. All work and materials shall be in full accordance with local and/or state ordinances, and with any other prevailing rules and regulations.
Bally Refrigerated Boxes, Inc., is not responsible for furnishing items required by the regulations, unless specified or shown on the drawings or contained in the specifications.
4. Panels shall consist of interior and exterior metal skins precisely formed with steel dies and roll-form equipment and thoroughly checked with gauges for accuracy. The metal skins shall be placed into heated molds and liquid urethane injected between them. For extra rigidity, the exteriors of all vertical panels except corners and door panels shall have vertical grooves spaced on 5-3/4" centers. Urethane shall be foamed-in-place (poured, not frothed) and, when completely heat-cured, shall bind tenaciously to the metal skins to form an insulated panel. Panels shall contain 100 percent urethane insulation and have no internal wood or structural members between the skins. To insure tight joints, panel edges must have foamed-in-place tongues and grooves with a flexible vinyl gasket on the interior and exterior of all tongue edges. Gaskets shall be resistant to damage from oil,

fats, water and detergents and must be NSF-approved. Panel thickness: 4" _____ 5" _____ 6" _____

5. Exterior Finish

- A. _____ Stucco-embossed Galvalume® steel
B. _____ Smooth galvanized steel with white polyester painted finish
C. _____ Stainless steel
D. _____ Stucco-embossed aluminum
E. _____ Stucco-embossed aluminum with white polyester painted finish
F. _____ Stucco-embossed galvanized steel with sand-tan polyester painted finish
G. _____ Stucco-embossed galvanized steel with white polyester painted finish
H. _____ Kynar over steel
I. _____ Sandex stone-textured finish over steel

6. Interior Finish

- A. _____ Stucco-embossed Galvalume steel
B. _____ Smooth galvanized steel with white polyester painted finish
C. _____ Stainless steel
D. _____ Stucco-embossed aluminum
E. _____ Stucco-embossed aluminum with white polyester painted finish
F. _____ Stucco-embossed galvanized steel with sand-tan polyester painted finish
G. _____ Stucco-embossed galvanized steel with white polyester painted finish

7. All panels except corner panels shall be made in 23" and 46" widths, fully interchangeable for fast, easy assembly. Panels 11-1/2", 17-1/4" or 34-1/2" wide are to be furnished only if required to fit the allocated space. To assure perfect alignment and maximum strength, corner panels shall employ a right-angle configuration with exterior horizontal dimensions of 12" on each side. Vertical panels (except corner panels) shall be supplied in a single length up to 28' high (16' high for installations with aluminum or stainless steel finish). For outdoor applications, single-height panels greater than 19' (16' for aluminum) or multi-tiered vertical panels must be secured to horizontal girts mounted between building columns.

8. Panels shall be equipped with Bally Speed-lok diaphragmatic joining devices. The distance between locks shall not exceed 46". Each device shall consist of a cam-action, hooked locking arm placed in one panel, and a steel rod positioned in the adjoining panel, so that when the arm is rotated, the hook engages the rod and draws the panels tightly together with cam action. Arms and rods shall be housed in individual steel pockets. Pockets on one side of the panel shall be connected to pockets

SPECIFICATIONS — CONTINUED

on the other side in width, by the use of 2"-wide metal straps set into and completely surrounded by the insulation. When panels are joined together, these straps shall form lock-to-lock connections for extra strength.

9. Floor Construction — Bally furnishes floor panels only. All construction and preparation for Bally floor panels must be provided by others. Floor panel construction shall be similar to that described in sections 7 and 8 above, but with a heavier-gauge interior skin; thickness of floor panels may be different than that of vertical panels. 4"-thick floor panels can be NSF or non-NSF. 5"- and 6"-thick panels are non-NSF.

A. _____ Light-usage Floor — Floor panels shall be placed on a concrete pad and leveled. Where inside floor and outside platform must be level, the concrete pad shall be made with a depression deep enough to receive the Bally floor panels.

B. _____ Heavy-usage Floor — Floor panels shall be placed on a depressed concrete pad and leveled. After supporting steel is assembled, a 4" reinforced concrete wearing floor shall be poured. The depression shall be deep enough to make interior and exterior finished floors the same height.

C. _____ Built-in, Insulated Floor — The floor shall be constructed on the job site. It shall consist of a depressed, reinforced concrete sub-slab. Slab urethane shall be built into this depressed slab and tile floor or 4" reinforced concrete wearing floor installed on top. Wall panels shall be fastened to this floor. Adequate drainage and ventilation or other heat source must be provided beneath and around all construction.

Floor Panel Finishes

A. _____ 14 ga. galvanized steel

B. _____ 16 ga. stainless steel

Special Construction Floor Panels

A. _____ Reinforced Floor Panels — 4"-thick insulated floor panels contain non-conductive structural imbeds for maximum strength without freezing. Standard steel plate overlay adds strength. Panels support up to 1200 pounds per square foot (evenly distributed) and support pallet jacks or light forklifts with total weight of up to 2000 pounds per wheel (diamond plate overlay required).

10. Hinged Entrance Door Panels

Number of doors _____

Width and height of each door _____

(Select dimensions from this list:)

Widths: 30" 36" 42" 48" 60"

Heights: 78" 84"

Number of doors, location and direction of swing is specified on the plans. Doors are infitting and flush-mounted.

Construction shall be as specified in 7.

Magnetic core, thermoplastic gaskets installed on the top edge and both sides of the door shall keep the door in a closed position, forming a tight seal; a flexible, dual-blade wiper gasket shall be installed at the bottom of the door. NSF-approved gaskets shall be replaceable and resistant to damage from oil, fats, water and detergent.

A heavy U-channel structural steel frame around the perimeter of the door opening shall prevent racking or twisting; steel frame is to be reinforced for hardware attachment.

Anti-condensate heater wire shall be concealed behind the metal edge of the door jambs. The door panel shall also include a vapor-proof interior lamp; junction box for 120v., 60 cycle, 1 phase, a.c. service (15 amp maximum); 2"-dia. flush-face dial thermometer (field mounted on 60" wide doors); and weather hoods for outdoor installations.

Hardware

A. _____ For doors with 30" or 36"-wide openings: two spring-loaded, self-closing hinges; cylinder latch with provision for padlocking and safety release mechanism; door closer.

B. _____ For doors with 42", 48" or 60"-wide openings: hinges are uplift type with blades not less than 9" long; latch shall include provision for padlocking and safety release mechanism.

Hardware Finishes

A. _____ For walk-ins finished with stainless steel — polished aluminum

B. _____ For walk-ins with finishes other than stainless steel — satin aluminum

C. _____ For walk-ins with any finish (if desired) — chrome-plated

Door Options

A. _____ Hinged Super Entrance Door — Construction is identical to that of a standard door except that a third hinge is added and the door and portion of door panel are protected by diamond-plate kick panels covering the bottom 32" on interior and exterior. Show number and size of super doors

(Check following options as desired.)

B. _____ Observation Window in Entrance Door — (a 14-1/2" x 24" heated observation window shall be

SPECIFICATIONS — CONTINUED

provided in the entrance door. It consists of three panes of glass with sealed air spaces between them. The window shall be supplied with heated glass and frame and unit shall be removable for replacement.)

C. Mortise Lock — Heavy-duty, dead-bolt lock with full safety release capabilities. Mortise lock installations shall also be provided with stainless steel pins engaging the door frame on the hinged side.

D. Strip Curtain — Sturdy, NSF-approved, clear-vinyl strip curtains shall permit easy passage while minimizing air infiltration.

11. Options — check as desired

A. Pressure Relief Port (required for all freezers)

B. Partition Walls — Insulated, 4"-thick metal-clad panels shall be provided to form separate compartments within the walk-in. A non-conductor strip must be built into all exterior panels at the joints where partitions butt to prevent transfer of heat from one compartment to another. Partition panels shall be Speed-Lok'ed to these panels. Construction shall be as specified in 7 above.

C. Roof Options — One of the following types must be used for any outdoor installation:

 Sectional prefab metal roof shall be used with structures installed outdoors on buildings of any length but not exceeding 34'7" in width. Roofs shall be made of stucco-embossed aluminum.

 Single-piece, presized membrane roof system; maximum dimensions: 34'7" x 34'7".

 Built-up type by others.

D. Alarm Systems

 Audio-Visual Alarm System

 Audio-Visual Alarm with digital temperature readout Hi set point only

 Audio-Visual Alarm with digital temperature readout Hi Low set point with dry contact

E. Double-swing Cart Door

F. Reach-in Doors for Product Loading (insulated solid type)

Insert correct sizes: 18-1/2" x 30" or 30" x 30"

(For multi-compartment units, provide plan view with compartment temperatures.)

13. Warranties

Bally shall warrant that any part of the structure it supplies (except the refrigeration system and its related accessories) is free from defects in materials or workmanship under normal use and service. The insulated panel portion of the structure is warranted free from defects under normal use and service for a period of 10 years from date of installation (but in no event shall the warranty be in force for more than 10 years and 6 months from the date the product was first shipped by Bally). Panel surface condition is warranted free from defects under normal use and service for one year from installation, provided the panel is stored and installed according to Bally's instructions. Mechanical (including hardware, gasketing, Speed-lok assemblies, aluminum weather roofs) and electrical components, except refrigeration systems (which are covered by a separate warranty) are warranted to be free from defects under normal use and service for one year from date of installation. (In no case shall this portion of the warranty be in force for more than one year and six months from the date the product was first shipped by Bally.) The warranty shall not include any labor charges for replacement or repair of defective parts or refrigeration. Full warranty information is to be provided with the walk-in.

Refrigeration System +35°F - Coil

Mark # 842

MANUFACTURER Bohn

MODEL # Per Plan

- FEATURES**
- Set to maintain +35°F in cooler section of cabinet.
 - Assemble complete operating system per General Specifications.
 - Building sleeves for installation of refrigerant lines shall be provided by G.C.

Notes:

Capacities are rated at 65°F return gas and 5°F subcooling.

The unit model numbers above denote construction with fan guards and bx conduit. The second digit of the model number will change on units ordered without either.

Pressures are listed in PSIG (#) and reflect suction pressure at the compressor inlet. Temperatures shown are the corresponding saturation temperatures. Saturation conditions at the evaporator will be higher due to pressure drop in suction line.

Pressure control (if supplied) with E-line units extends 2" beyond the base on 1/2 H.P. units. It is located on the crankcase end of the compressor.

"Elec" code is a part of the model number.

"M/C amps" is minimum circuit ampacity value developed for U.L. This value has a calculated safety factor and can be used for wire sizing.

For remote applications, additional receiver capacity may be necessary to assure adequate pumpdown capacity.

Amp data for CAV models is shown for the highest current condition which is at 208 volt.

All three phase models use single phase fan motors.

Operating voltage range . . . plus 10%, minus 10% including 208/230 volt (187 to 253 volt)

Contact Copeland for data on models rated for 50 hertz.

SUPER ADJUSTABLE SUPER ERECTA SHELF® WIRE SHELVING

Super Adjustable Super Erecta Wire Shelving is the most advanced and innovative wire storage system available. A unique Corner Release System and SiteSelect™ Posts make changing shelf levels fast and easy, without tools! And Super Adjustable Shelving works in conjunction with the entire Super Erecta System of shelves and accessories.

- **Easily Adjustable:** Unique Corner Release and SiteSelect Posts create a total system that offers "Tool-Free," fast adjustment at 1" (25mm) intervals along the entire height of the posts.
- **Easily Assembled:** The Corner Release System and SiteSelect Posts, combined with the original "bottom up" assembly process, creates a complete shelving system in minutes, without tools! SiteSelect Posts with the double-groove visual guide feature, have circular grooves at 1" (25mm) intervals and are numbered at 2" (50mm) intervals. Shelves simply seat into place using the Corner Release.
- **Unique Shelf Design:** The open wire design of these heavy-gauge shelves minimizes dust accumulation and allows a free circulation of air, greater visibility of stored items and greater light penetration. Shelf ribs run front to back allowing you to slide items on and off easily. Shelves can be loaded and unloaded from all sides. This open construction allows use of maximum storage space of cube.
- **Unique Post Design:** New SiteSelect post design provides a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves. Bolt leveler on post bottom compensates for uneven surfaces.
- **Fast, Easy Reconfiguration:** Super Adjustable Super Erecta can change as quickly as your needs change. By using various accessories, hundreds of shelving configurations become possible.
- **Choice of Finishes:** Super Adjustable Super Erecta Wire Shelving is available in a variety of finishes: Super Erecta Brite and chrome-plated for dry storage, Metroseal 3™ with antimicrobial product protection, and stainless steel for corrosive environments, and a large array of designer colors (see Catalog Sheet 10.14A).

Dishwasher - Undercounter

Mark # 847

MANUFACTURER Hobart

MODEL # LXe

FEATURES

- Verify if hot water or chemical sanitizing.
- Verify need for booster heater.
- Only hot water sanitizing unit is Energy Star rated.

HOT AND COLD****HOBART****STANDARD FEATURES**

- 32 racks per hour – LXeH
- 34 racks per hour – LXeC
- .74 gallons of water per rack
- Hot water or chemical sanitation units available
- Low chemical alert indicators
- Sense-A-Temp™ booster heater capable of 70° rise, provided on LXeH models
- Delime notification with cycle
- Chemical pump “auto-prime”
- Service diagnostics
- Deep drawn stainless steel tank
- Microcomputer, top mounted controls with digital cycle/temperature display
- Revolving upper and lower anti-clogging wash arms
- Revolving upper and lower rinse arms
- Removable stainless steel scrap screen
- Corrosion resistant pump
- Automatic pumped drain
- 17" door opening
- Automatic fill
- Detergent and rinse aid pumps standard (plus sanitizer pump on chemical machine)
- Electric tank heat
- Two dishracks – one peg and one combination type

STANDARD VOLTAGES

- 120/208-240(3W)/60/1 (LXeH model only)
- 120/60/1 (LXeC model only)

OPTIONS AT EXTRA COST

- 208-240(2W)/60/1 (LXeH model only)
- 208-240/60/3 (LXeH model only)

MODELS

- LXeC
- LXeH

ACCESSORIES

- Power cord kits
- Stainless steel base with 6" legs
- 17" stainless steel stand with storage
- External caster kit
- DWT-LXe drain water tempering kit

Specifications, Details and Dimensions on Back.

**LXe HOT AND COLD**

NOTICE

Required flowing water pressure to the dishmachine is 15-65 PSIG. If pressures higher than 65 PSIG are present, a pressure regulating valve must be installed in the water line to the dishmachine (by others). Pressure gauge not required on pumped rinse machines.

Important: The chemical containers should be placed no higher than 10" above floor.

If chemical containers are to be placed in cabinet adjacent to machine, a 1/2" dia. hole is required in the cabinet to run chemical supply line.

Notes:

- All vertical machine dimensions taken from floor may be increased by 1".
- Moist air escapes from the door. Use only moisture resistant materials adjacent to dishmachine sides and top.
- A vent hood is not recommended above the undercounter dishmachine since it does not produce excessive vapors.

Plumbing notes:

- Water hammer arrestor (meeting ASSE-1010 Standard or equivalent) to be supplied (by others) in common water supply line at service connection.
- Recommended water hardness to be 3 grains or less for best results.
- If drain hose is looped above a sink, the loop must not exceed 38" AFF.

CONNECTION INFORMATION (AFF = ABOVE FINISHED FLOOR)

LEGEND

- E1 ELECTRICAL CONNECTION: 1-3/8" DIA. HOLE FOR 1" TRADE SIZE CONDUIT; 4-5/8" AFF.
- P1 SINGLE FILL AND RINSE CONNECTION: 3/4" FEMALE GARDEN HOSE FITTING ON 6' LONG HOSE SUPPLIED WITH MACHINE.; 110°F WATER MIN FOR LXeH
- P2 DRAIN CONNECTION: 5/8" BARB FITTING WITH 6' LONG HOSE SUPPLIED WITH MACHINE.

▲ WARNING

**Do not premix other chemicals and sodium hypochlorite (liquid bleach).
Mixing may cause hazardous gas to form.**

NOTICE

Required flowing water pressure to the dishmachine is 15-65 PSIG. If pressures higher than 65 PSIG are present, a pressure regulating valve must be installed in the water line to the dishmachine (by others). Pressure gauge not required on pumped rinse machines.

Important: Chemical containers should be placed no higher than 10" above floor.

If chemical containers are to be placed in cabinet adjacent to machine, a 1/2" dia. hole is required in the cabinet to run chemical supply line.

Use only 6% or 8.4% sodium hypochlorite (liquid bleach) as sanitizing chemical to insure proper operation of dishmachine.

Certain materials including silver plate, aluminum and pewter are attacked by sodium hypochlorite (liquid bleach). See instructional manual.

Notes:

- All vertical machine dimensions taken from floor may be increased by 1".
- Moist air escapes from the door. Use only moisture resistant materials adjacent to dishmachine sides and top.
- A vent hood is not recommended above the undercounter dishmachine since it does not produce excessive vapors.

Plumbing notes:

- Water hammer arrestor (meeting ASSE-1010 Standard or equivalent) to be supplied (by others) in common water supply line at service connection.
- Recommended water hardness to be 3 grains or less for best results.
- If drain hose is looped above a sink, the loop must not exceed 38" AFF.

SPECIFICATIONS

DESIGN: Front opening, equipped for installation in either freestanding or undercounter-type operations.

CONSTRUCTION: 300 series stainless steel tank, door and top panel.

PUMP: Centrifugal-type, integral with motor, horizontally mounted. Pump capacity 38 gpm.

MOTOR: Single phase, furnished for all electrical specifications. Factory sealed lubrication. Inherent overload protection with auto reset.

WASH AND RINSE CYCLE: Complete automatic type, controlled by solid-state electronics. Cycle may be interrupted any time by opening door. Cycle continues when door is closed.

- Initial cycle fills wash tank, to be recirculated each wash cycle. Some wash water is drained off before rinse cycle. Rinse cycle refreshes wash water and tank heat.

RINSE PUMP: Powered by a single phase motor, the rinse pump is made of high strength engineered composite material.

RINSE AND SANITATION:

- LXeH:** Sanitation is accomplished by means of a built-in booster heater designed to raise temperature of water to a minimum of 180°F from an incoming water temperature of 110°F.

- LXeC:** Sanitation is accomplished by injection of proper amount of sodium hypochlorite solution (liquid bleach) into final rinse water to achieve a minimum of 50PPM sanitizing solution. Injection of sodium hypochlorite is accomplished by a built-in sanitizing chemical pump.

PUMPED DRAIN: Machine automatically drains water through a built-in pump. Maximum 38" drain height permitted.

RACKING: Machines accommodate racks from 10" x 20" to 20" x 20". Also accepts 16" x 18" cafeteria trays.

NOTE: Certain materials, including silver, aluminum and pewter are attacked by Sodium Hypochlorite solution in the chemical sanitizing mode of operation.

SPECIFICATIONS: Listed by Underwriters Laboratories Inc. and NSF International.

Job _____

SUPER ERECTA SHELF™ SOLID SHELVING (18-Gauge)

- **Strength:** Two-fold thickness of 18-gauge steel forms $\frac{1}{8}$ " raised edges on all four sides of the shelving. This ship's edge gives all-around rigidity and high-strength. Sturdy aluminum castings firmly lock the corners to the posts.
- **Fast, Secure Assembly:** Post has rolled, circular grooves along its entire length at 1" (25mm) intervals. A patented, tapered split sleeve (plastic or aluminum) snaps together around each post. Tapered openings in the shelf corners slide over the tapered split sleeves providing a positive lock. Shelf is assembled in minutes without the use of nuts or bolts, without the use of any special tools.
- **Sanitary:** The raised ship's edge on all four sides and at the corners contains spillage, minimizes contamination and permits easier clean-up. Embossed or louvered/embossed shelf designs allow air circulation under packages and containers.
- **Versatile Construction:** Super Erecta Shelf® solid shelving can change as quickly as your needs change. By using various accessories hundreds of shelving configurations become possible.
- **Shelf Accessibility:** Shelves can be loaded/unloaded from all sides. This open construction allows use of the maximum storage space of the cube.
- **Adjustability:** Shelves can be adjusted in 1" (25mm) intervals along the entire length of the post.
- **Finishes:** Available in two options: stainless steel and galvanized.
- **Adjustable Feet:** Bolt levelers compensate for surface irregularities.

Item# _____

Job _____

Double Shelf Post Type

Single Shelf Direct Wall Mount

Single

Double

SUPER ERECTA SHELF® POST-TYPE AND DIRECT WALL MOUNTS FOR WIRE AND SOLID SHELVES

- **Ideal for Storing** items conveniently overhead or above work surfaces.
- **Accommodate** all Super Erecta Shelf sizes and types of shelf. Wire lugs on support fit corner openings of shelf. Metal caps are provided to cover openings.
- **Single and Double Supports:** Double support used for mounting adjacent shelves; single supports at ends of shelving tier. Available in nickel-chrome or stainless steel.

Post-Type Mounts

- **Versatile:** Metro's post-type mounting system can meet your exact needs for wall shelving. Posts and supports are available to hold anything from a single small shelf to many tiers of shelving running continuously along a wall.
- **Fast, Secure Assembly:** Post has rolled, circular grooves along its entire height at one-inch intervals. Tapered, plastic split-sleeve locks around any groove, and matching taper in opening on shelf support provides secure positioning.
- **Adjustable:** Shelf supports and shelves can be positioned or repositioned on the post in one-inch increments.
- **For Easy Ordering** pre-packaged components are available in "End Units" and "Mid Units" to meet a wide range of wall-shelving requirements.

Direct Mounts

- **Two-Piece:** Support is held by mounting plate, which attaches directly to the wall.
- **Conserve Space:** Back of shelf is within a fraction of an inch from the wall.

InterMetro Industries Corporation

Wilkes-Barre, PA 18705

SUPER ERECTA SHELF® POST-TYPE AND DIRECT WALL MOUNTS

Post-Type Wall Mounts — Standard Units

Post-type wall mounts are available in pre-packaged "End Units" and "Mid Units," complete with all needed components except wall bolts or screws, which must be selected according to type of wall*. Shelf supports are chrome-plated.

"End Unit" consists of two posts with brackets, and two single supports for each shelf.

"Mid Unit" consists of one post with brackets and double support for each tier.

If shelving is to be the length of one shelf, order End Unit Only.

If two shelf lengths, order one End Unit and one Mid Unit; three lengths, one End and two Mid Units; four lengths, one End and three Mid Units; etc.

Catalog Numbers

Number of Tiers	Post Number	14" Shelf Width		18" Shelf Width		21" Shelf Width		24" Shelf Width

Disposer and Control

Mark # 849

MANUFACTURER Red Goat

MODEL # A2P-R7

- FEATURES**
- Verify with local jurisdictions that disposer is allowed and acceptable.
 - For 208 volt, three phase operation.
 - Manual reversing switch - RMS-2.
 - Flow control and 208V solenoid valve.
 - A-RSA 7" sink throat assembly for integral welding.
 - Silver trap and splash shield.
 - Provide Fisher Model #3990 style vacuum breaker.
 - Mount to pre-rinse sink as shown on plan.

	A3P-07	3	3	7"
A5P-07	5	3	7"	

APPLICATION:

Medium size restaurant kitchen. Ideal for vegetable preparation, salad and pot sink areas of large kitchens. Complies with military specifications, including shipboard use. Can be used with salt water applications (specify HC option).

DESIGN AND CONSTRUCTION:

- Waste chamber design permits dual directional operation when used with reversing control or switch, doubling the life cycle of the shattering mechanism. Regular waste chamber available with either a 4½" or 7" throat size.
- Tight tolerance in the cutting mechanism allows for approximately ⅛" or 3.175 mm or less of waste to pass through to sanitary.
- Basic body components are cast gray iron, machined, primed and powder coated. 8" diameter rotor with (2) bolt-on reversible impact bars and sizing ring are cast ductile iron, machined, balanced and heat treated.
- Bolt-on, threaded discharge flange for easy removal and ridged drain connection. Also includes flexible drain connector that slips over flange and fastens quickly to either metal or PVC drain line (2" pipe size). This allows installer options that best fit their need.
- Stainless steel legs and feet, adjustable from 0" to 2".
- Disposer connects to Cone or Sink Assembly by means of a neoprene isolation sleeve and (2) stainless steel clamps.
- Offset Design: For maximum space utilization, disposer is also available with an 8" offset waste chamber for both Cone and Sink attachments. (Available with 7" diameter throat size only)

MOTOR:

- Reversing, heavy duty, T.E.F.C., 1725 RPM (1425 RPM, 50 Hz), full rated horsepower, double sealed, permanently lubricated ball bearings.
- Thermal overload protection with manual reset button.
- Available for single phase or three phase installations.
- Available in 1½ HP for light waste, 2 HP for standard use, 3 & 5 HP for heavy duty use.
- Dual voltage windings allow multi-voltage operation by motor lead connection (see motor wiring diagram). 115-230V, 60Hz; 110/220V, 50 Hz, 1 Ph; 208-230/460V, 60 Hz; 208/415V, 50 Hz, 3 Ph.

CONTROLS:

NOTE: Electrical switches or control centers not included, must be selected as required.

PLUMBING:

- 8 GPM @ 20 PSIG, ½" NPT
- 2" drain line with trap
- Not grease trap compliant

ELECTRICAL:

- Please refer to electrical requirements on page 2.

OPTIONAL FEATURES:

- For Hard Chrome option, add HC to the end of the disposer model number.
- Adaptor Kits: Adaptor kits are available to allow installation of Red Goat Disposers to virtually any sink or cone size or configuration. Refer to "Adaptor Kit Selection Guide" for specific kit model numbers.

Spray Rinse

Mark # 850

MANUFACTURER Fisher

MODEL # 89745

- FEATURES**
- Manufacturer's standard unit 2210-1WB.
 - Ultra-spray valve with knife spray pattern.
 - Include wall bracket.
 - Provide Fisher Model #2932-0002 in-line dual check valve; provide additional vacuum breaker per local code.
 - If disposer, Mark 850, is not allowed by code, delete this item.

FEATURES:

CONTROL VALVE

- * ECCENTRICS ADJUST FROM 7-1/2" TO 8-1/2"
- * INTERNAL SPRING LOADED CHECK VALVES
- * SWIVELLING SEAT DISKS
- * HOT SIDE STEM - RIGHT HAND, COLD - LEFT HAND
- * STAINLESS STEEL SEATS
- * STAINLESS STEEL SEAT SCREWS
- * STAINLESS STEEL HANDLE SCREWS

HOSE

- * 36" LENGTH
- * STAINLESS STEEL END FITTINGS
- * STAINLESS STEEL EXTERNAL JACKET
- * 3 PLY FIBER REINFORCED INTERNAL RUBBER HOSE
- * REPAIRABLE IN FIELD WITH SIMPLE TOOLS

STANDARD SPRAY VALVE

- * NOZZLE THREADED INTO VALVE
- * 2.65 GPM AT 80 PSI
- * SHOWER SPRAY PATTERN

ULTRA SPRAY VALVE

- * NOZZLE THREADED INTO VALVE
- * 1.60 GPM AT 80 PSI
- * KNIFE SPRAY PATTERN

WALL BRACKET

- * ADJUSTS FROM 2" TO 12"

RECOMMENDED SETTINGS

- * 110°F AT 80 PSI

SYSTEM LIMITS

- * TEMP: 40°F MIN. TO 140°F MAX.
- * PRESSURE 200 PSI MAX. STATIC

SHIPPING WEIGHT

- * 12.0 LBS

Corner Guards and Flash Trim

Mark # 851

MANUFACTURER Fabricator

MODEL # Custom

FEATURES

- See cut sheet for fabrication details.
- Locate as shown on plan or as necessary in food production areas, on every exposed outside corner of construction, walk-in cabinet, and vertical/horizontal gaps and crevices.
- Break 90° +/- for tight fit, apply with mastic adhesive.
- Deburr edges and corners.
- Walk-in cabinet flashing to match same material as units enclosed.
- Seal with clear silicone sealant.

Reach-In Solid Swing Door Freezer with Hydrocarbon Refrigerant

T-49F-HC

- ▶ True's solid door reach-in's are designed with enduring quality that protects your long term investment.
- ▶ Designed using the highest quality materials and components to provide the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.
- ▶ Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydro carbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- ▶ High capacity, factory balanced refrigeration system that maintains -10°F (-23.3°C) temperatures. Ideal for both frozen foods and ice cream.
- ▶ Stainless steel solid doors and front. The very finest stainless with higher tensile strength for fewer dents and scratches.
- ▶ Adjustable, heavy duty PVC coated shelves.
- ▶ Positive seal self-closing doors. Lifetime guaranteed door hinges and torsion type closure system.
- ▶ Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

Bottom mounted units feature:

- ▶ "No stoop" lower shelf.
- ▶ Storage on top of cabinet.
- ▶ Compressor performs in coolest, most grease free area of kitchen.
- ▶ Easily accessible condenser coil for cleaning.

*Reach-In Solid Swing Door Freezer with
Hydrocarbon Refrigerant*

STANDARD FEATURES

DESIGN

- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydro carbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains -10°F (-23.3°C) temperatures. Ideal for both frozen foods and ice cream.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Bottom mounted condensing unit positioned for easy cleaning. Compressor runs in coolest and most grease free area of the kitchen. Allows for storage area on top of unit.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

CABINET CONSTRUCTION

- Exterior - Stainless steel front. Anodized quality aluminum ends. Corrosion resistant GalFan coated steel back.

- Interior - attractive, NSF approved, clear coated aluminum liner. Stainless steel floor with coved corners.
- Insulation - entire cabinet structure and solid door are foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.
- Frame rail fitted with 4" (102 mm) diameter stem castors - locks provided on front set.

DOORS

- Stainless steel exterior with clear aluminum liner to match cabinet interior. Doors extend full width of cabinet shell. Door locks standard.
- Lifetime guaranteed recessed door handles. Each door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to ensure permanent attachment.
- Positive seal self-closing doors. Lifetime guaranteed door hinges and torsion type closure system.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.

SHELVING

- Six (6) adjustable, heavy duty PVC coated wire shelves 24 1/16" L x 22 3/8" D (624 mm x 569 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

LIGHTING

- LED Interior lighting - safety shielded. Lights activated by rocker switch mounted above doors.

MODEL FEATURES

- Exterior temperature display.
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Rear airflow guards prevent product from blocking optimal airflow.
- NSF/ANSI Standard 7 compliant for open food product.

ELECTRICAL

- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES

Upcharge and lead times may apply.

- 230 - 240V / 50 Hz.
- 6" (153 mm) standard legs.
- 6" (153 mm) seismic/flanged legs.
- Alternate door hinging (factory installed).
- Novelty baskets.
- Additional shelves.
- Half door bun tray racks. Each holds up to eleven 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- Full door bun tray racks. Each holds up to twenty-two 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).

i5™

THE i5™

PERFORMANCE

Utilizing TurboChef's patented technology to rapidly cook food without compromising quality, the i5 oven maximizes versatility with its large cavity size and ability to cook with most any metal pan.

VENTILATION

- UL (KNLZ) listed for ventless operation.†
- EPA 202 test (8 hr):
 - Product: Pepperoni Pizzas
 - Results: 2.80 mg/m³
 - Ventless Requirement: <5.00 mg/m³
- Internal catalytic filtration to limit smoke, grease, and odor emissions.

EXTERIOR CONSTRUCTION

- Two-tone stainless steel front, top and sides
- 304 stainless steel removable grease collection pan
- Ergonomic door handle
- Rubber seal for surface mounting
- Side hand grips for lifting

INTERIOR CONSTRUCTION

- 304 stainless steel
- Fully insulated cook chamber
- Removable rack with dual setting option
- Top and bottom jetplates

STANDARD FEATURES

- Integral recirculating catalytic converter for UL (KNLZ) listed ventless operation
- Independently-controlled dual motors for vertically-recirculated air impingement
- Top-launched microwave system
- Stirrer to help ensure even distribution of air and microwave
- Variable rack positioning
- External air filtration
- Smart menu system capable of storing up to 200 recipes
- Flash software updates via smart card
- Single or multiple-temperature interface
- Smart Voltage Sensor Technology* (U.S. only)
- Vent catalyst to further limit emissions
- Built-in self-diagnostics for monitoring oven components and performance
- Stackable (requires stacking stand)
- Field-configurable for single or 3-phase operation
- Includes plug and cord (6 ft. nominal)
- Warranty – 1 year parts and labor

COMES WITH STANDARD ACCESSORIES

- 1 Aluminum Paddle (NGC-1478)
- 1 Bottle Oven Cleaner (103180)
- 1 Bottle Oven Guard (103181)
- 2 Trigger Sprayers (103182)
- 2 PTFE Baskets (NGC-1331)

1. Blower Motors
2. Microwave System
3. Stirred Impinged Air (Top) and Microwave
4. Impinged Air (Bottom)
5. Catalytic Converter
6. Impingement Heater
7. Vent Tube Catalyst

This product conforms to the ventilation recommendations set forth by NFPA96 using EPA202 test method.

* Smart Voltage Sensor Technology does not compensate for lack of or over voltage situations. It is the responsibility of the owner to supply voltage to the unit according to the specifications on the back of this sheet.

† Ventless certification is for all food items except for foods classified as "fatty raw proteins." Such foods include bone-in, skin-on chicken, raw hamburger meat, raw bacon, raw sausage, steaks, etc. If cooking these types of foods, consult local HVAC codes and authorities to ensure compliance with ventilation requirements.

Ultimate ventless allowance is dependent upon AHJ approval, as some jurisdictions may not recognize the UL certification or application. If you have questions regarding ventless certifications or local codes please email ventless.help@turbochef.com

TurboChef reserves the right to make substitutions of components or change specifications without prior notice.

KD Wall Shelf

FEATURES:

Furnished with a 1 1/2" sanitary downward rolled rim with a 1 1/4" turn-up edge on sides and rear.
Unit is easily assembled employing the slip-fit TAB-LOK design.

CONSTRUCTION:

Shelf and brackets are die stamped and die formed.

MATERIAL:

WS-KD Series - 18 gauge stainless steel polished to a satin finish.

AWS-KD Series - Heavy gauge aluminum.

Item #: _____ **Qty #:** _____
Model #: _____
Project #: _____

Requirements for NSF Installations

1. Install at least 60" above floor.
2. Limit to dry storage.
3. Avoid contact with liquids.
4. For "Ganging-Up" installation, allow at least 2" between units or mount units side by side and seal joints with an approved sealant.

WORK TABLES

PREMIUM Series - 5" Backsplash - Open Base Style

Item #: _____ Qty #: _____
 Model #: _____
 Project #: _____

FEATURES:

Top is furnished with 1 5/8" sanitary rolled rim edge on front and square sides, and a 5" splash with a 1" return on the rear side.

24" wide tables supplied with TWO hat channels stud welded to reinforce and maintain a level working surface. 30" and 36" wide tables supplied with THREE hat channels.

Pre-engineered welded angle adapters insure ease of future drawer installation.

Front to back Stretchers are welded to legs. Left to right Stretcher bolted to legs and requires assembly.

CONSTRUCTION:

All TIG welded. Exposed weld areas polished to match adjacent surfaces.

Entire top mechanically polished to a satin finish.

Top is sound deadened.

Roll formed embossed galvanized hat channels are secured to top by means of structural adhesive and weld studs.

Gussets welded to support hat sections.

NEW

Rolled Rim Edges on Front & Splash on Back and Square Side Edges

1-5/8" LEG STRETCHERS Ensure Stability

MATERIAL:

TKSS-SERIES: Stainless Steel Legs - Open Base

TOP: 14 gauge stainless steel type "304" series.

STRETCHERS: 1 5/8" dia. tubular stainless steel.

LEGS: 1 5/8" diameter tubular stainless steel.
 1" adjustable stainless steel bullet feet.
 Stainless steel gussets.

TKLG-SERIES: Galvanized Legs - Open Base

TOP: 14 gauge stainless steel type "304" series.

STRETCHERS: 1 5/8" dia. tubular galvanized steel.

LEGS: 1 5/8" diameter tubular galvanized steel.
 1" adjustable plastic bullet feet.
 Galvanized steel gussets.

SMPT FOOD WARMER

SMPT FOOD WARMER

Wells SMPT Food Warmer is designed to hold heated foods at desired serving temperature and can be operated wet or dry. The 12" x 20" warming well easily adapts to hold a mixture of fractional inset pans, allowing for a variety of product servings.

Features

- **12" x 20" warming pan is deep-drawn, stainless steel** and easily accommodates a variety of fractional or round inset pans up to 6" deep.
- **The tubular element**, located under the warming pan, allows for quick heating.
- **The positive-off thermostat** controls the element allowing for adjustable and more consistent temperatures. A signal light indicates that the heating element is energized.
- **Control** is mounted with a protective guard ring to help prevent accidental temperature changes.
- Designed for **wet or dry operation**.
- **Warmers** are Underwriters Laboratories, Inc. LISTED and meet NSF International and Canadian standards.
- **A one-year warranty** against defects covers parts and labor.

500-S SERIES LOW TEMPERATURE HOT FOOD HOLDING CABINETS

- HALO HEAT...a controlled, uniform heat source that gently surrounds food for better appearance, taste, and longer holding life.
 - Holds hot food hot...meat, poultry, fish, potatoes, casseroles, vegetables, rolls, etc.
 - Close temperature tolerance and even heat application maintain ideal serving temperatures throughout the cabinet.
 - Stainless steel interior resists corrosion.
 - Available in reach-in or pass-through design.
 - Casters provide easy mobility.
 - Can be stacked with an identical unit or cook/hold oven to save space.
 - Antimicrobial handle retards the growth of illness-causing pathogens.
 - Digital control senses temperature drops faster, providing quick heat recovery time.
 - Door venting holds crispy food better.

Short Form Spec

Alto-Shaam single compartment 500-S hot food holding cabinet is constructed with a stainless steel exterior and stainless steel door with magnetic latch. The cabinet includes a Simple control with on/off power switch; up and down arrow buttons with a temperature range of 60°F to 200°F (16°C to 93°C); heat indicator light; temperature display buttons, and digital display. Included are two (2) chrome plated side racks with eleven (11) pan positions spaced at 1-3/8" (35mm) centers, two (2) chrome plated wire shelves, and one (1) set of 2-1/2" (64mm) heavy duty casters – 2 rigid and 2 swivel with brake.

MODEL 500-S Hot food holding cabinet

DELUXE CONTROL OPTION

- Solid state electronic control option simplifies temperature setting and has a clear, easy-to-read LED display and includes our patented SureTemp™ heat recovery system. SureTemp™ reacts immediately to compensate for any loss of heat whenever the door is opened.
- Deluxe control is also available with six independent multiple timers for each compartment to facilitate "first-in, first-out" concept.
- Deluxe control with internal temperature probe.

ANSI/NSF 4

IP X3

FACTORY-INSTALLED OPTIONS

- Electrical Choices
 - 120V
 - 208-240V
 - 230V
- Cabinet Choices
 - Reach-In, standard
 - Pass-Through, optional
- Exterior Panel Color Choices:
 - Stainless steel, standard
 - Burgundy, optional
 - Custom color, optional
- Door Swing Choices:
 - Right-hand swing, standard
 - Left-hand swing, optional

Note: Pass-through cabinets cannot have all doors hinged on the same side.

ADDITIONAL FEATURES

- Stackable design
Stackable with 500 Series single compartment ovens and holding cabinets. Order appropriate stacking hardware.

SIDE MOUNT SALAD TOP MODEL 9200-32-7

Randell mullion blower coil, with thermostatic control, cools pans and/or base, and allows for use of full depth interiors. R-134a expansion valve refrigeration system in refrigerators are CFC free. Units with durable shelf supports molded into sides, lift-off louver, condensate evaporator, "CFC free" foamed in place insulation and 6" high adjustable legs. Cordset for 115V operation.

PROJECT NAME:

LOCATION:

ITEM NO:

QTY:

MODEL NO:

AIA NO:

SIS NO:

CSI SECTION: 11400

AVAILABLE MODELS:

- 9210-32-7
- 9200-32-7
- 9230-32-7
- 9220-32-7

STANDARD FEATURES:

- Side mounted compressor with mullion "Turbo" coil provides proper pan cooling, and "full depth" usable interior space
- R-134a refrigerant in refrigerators and R-404a in freezers both are "CFC free"
- Exterior stainless steel top & front
- Foamed in place "CFC free" urethane insulation
- Self-closing doors with exclusive press-fit magnetic gaskets
- Shelf supports molded into sides
- Expansion valve
- Condensate evaporator
- Cord and plug for 115 volt operation
- 6" high adjustable legs
- Full length NSF approved 12" wide composition cutting board
- Stainless steel roll cover

CABINET EXTERIOR: Cabinet body is constructed of all metal. The top, front, sides and louver panel are stainless steel. Bottom & back of unit are corrosion resistant steel. Saladtop refrigerator to have top cutout with sanitary raised rim and recessed adaptor. Hinged, stainless steel roll-cover. Full length, NSF composition 12" cutting board provided.

CABINET INTERIOR: Interior of cabinet is fully covered to meet N.S.F. standard #7. The Interior bottom, back, and top are anodized aluminum with covered corners or easy clean-up. The interior ends are ABS. Shelf supports molded into sides. Unit insulated with a minimum of 2.5" of CFC free, foamed in place polyurethane.

DOORS: Stainless steel front with easy to grasp recessed handles, mounted on heavy duty concealed hinges. Hinges are all stainless steel with bronze pivot pin in nylon bushing. Doors with foamed in place insulation, press fit magnetic gaskets - (designed for installation & removal without tools), and deep draw ABS interior liner for maximum insulation value.

REFRIGERATION: Refrigerators utilize a CFC free, R-134a Expansion Valve refrigeration system that includes condensing unit, and thermostatic control for operator adjustability. Compressor housing to allow maximum airflow and permit mounting of standard hot gas condensate evaporator. Mullion coil, is coated to resist corrosion, and offers maximum air flow.

This equipment is intended for use in rooms having an ambient temperature of 86°F (30°C) or less.

ORIGIN OF MANUFACTURE: Designed and manufactured in the United States.

9200-32-7 Side Mount Salad Tops, Model 9200-32-7 shown.

OPTIONS/ACCESSORIES:

- Stainless steel back panel
- Tray racks for 24" or 27" openings only
- Refrigerated drawers
- Overshelves
- Casters

Drawings are to be viewed in the same order as the chart, one drawing to represent refrigerator and freezer units

NOTE: When ordering casters, 6" casters equal 35" height; 4" casters equal 33" height

Unit is easily assembled employing the slip-fit TAB-LOK design.

CONSTRUCTION:

Shelf and brackets are die stamped and die formed.

MATERIAL:

WS-KD Series - 18 gauge stainless steel polished to a satin finish.

AWS-KD Series - Heavy gauge aluminum.

Item #: _____ **Qty #:** _____
Model #: _____
Project #: _____

Requirements for NSF Installations

1. Install at least 60" above floor.
2. Limit to dry storage.
3. Avoid contact with liquids.
4. For "Ganging-Up" installation, allow at least 2" between units or mount units side by side and seal joints with an approved sealant.

S/S	ALUMINUM	length

HANDLE OPERATED COFFEE BREWER

CBS-5000 Series

CBS-52H-15

Twin 1.5 Gallon Brewer

The CBS-5000 Series was designed for simplicity. The Handle Operated Series brewers save the operator time and effort by delivering quick and consistent results from your pre-programmed coffee recipe. It is the reliable choice for serving high-volumes of single batch coffee all day long.

Handle operation — a quick start!

Simply twist the handle to begin the brew cycle and in minutes your perfectly brewed coffee is ready to serve.

Manual water faucet.

Safely dispense hot water away from steam and brew basket.

Set it and forget it.

Program your recipe once and this brewer delivers consistent and repeatable results.

Shown with 1.5 Gallon LUXUS® Thermal Dispensers (L40-15)

EV9324-01

Insurice Single-I 2000 System

Delivers premium quality water for ice applications

Insurice Single-I 2000 System: EV9324-01

I 2000 Replacement Cartridge: EV9612-21

BENEFITS

Reduces water-related ice machine problems caused by scale build-up from dirt and dissolved minerals

Reduces chlorine taste and odor and other offensive contaminants

Self-contained scale inhibitor feed keeps ice machines functioning at full capacity

Reduces maintenance and service costs by reducing scale and clogging of distribution lines, evaporator plate and pump

Precoat submicron technology reduces dirt and particles as small as 1/2 micron in size

Reduces possible health contaminants such as asbestos fibers and Cryptosporidium and Giardia cysts

Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

NSF Certified under NSF/ANSI Standards 42 and 53

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating

Never use saddle valve for connection

Use 3/8" water line

Do not connect system to water-cooled condenser

Install vertically with cartridges hanging down and allow 2-1/2" clearance below the cartridge for easy cartridge replacement

Flush cartridges by running water through system for five minutes at full flow

OPERATION TIPS

Change cartridges on a regular 6 month preventative maintenance program

Change cartridges when capacity is reached or when pressure falls below 10 psi

Service flow rate must not exceed 1.67 gpm

Always flush the filter cartridge at time of installation and cartridge change

APPLICATION/SIZING

For ice machine applications

Most cubers up to 750 lbs./day

Most flakers up to 1,500 lbs./day

Insurice Single-I 2000 System

SPECIFICATIONS

Overall Dimensions:

29"H x 7"W x 7"D

Inlet connection: 3/8"

Outlet connection: 3/8"

Service Flow Rate:

Maximum 1.67 gpm (6.3 Lpm)

Pressure Requirements:

10 - 125 psi (0.7 - 8.6 bar), non-shock

Temperature: 35 - 100°F (2 - 38°C)

No electrical connection required

Shipping Weight: 6 lbs.

Operating Weight: 9 lbs.

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.

WARRANTY

Everpure water treatment systems (excluding replaceable elements) are covered by a limited warranty against defects in material and workmanship for a period of five years after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Everpure will provide a copy of the warranty upon request.

System Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of:

Standard No. 42: Aesthetic Effects
Chemical Unit
Taste and Odor Reduction
Chlorine Reduction
Mechanical Filtration Unit
Particulate Reduction, Class I:
99.9+% reduction of particles
one-half micron and larger in size
Standard No. 53: Health Effects
Mechanical Filtration Unit
Turbidity Reduction
Cyst Reduction
Asbestos Reduction

Solid Door Refrigerator with Hydrocarbon Refrigerant

STANDARD FEATURES

DESIGN

- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydro carbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- Energy efficient, factory balanced refrigeration system with guided airflow to provide uniform product temperatures.
- High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Condensing unit access in back of cabinet, slides out for easy maintenance.

CABINET CONSTRUCTION

- Exterior - stainless steel front, top and ends. Corrosion resistant GalFan coated steel back.
- Interior - attractive, NSF approved, clear coated aluminum liner. Stainless steel floor with coved corners.

- Insulation - entire cabinet structure and solid door are foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- 5" (127 mm) diameter stem castors - locks provided on front set. 36" (915 mm) work surface height.

DOOR

- Stainless steel exterior with clear aluminum liner to match cabinet interior.
- Door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to ensure permanent attachment.
- Positive seal self-closing door with 90° stay open feature. Door swing within cabinet dimensions.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING

- Two (2) adjustable, heavy duty PVC coated wire shelves 23 1/4" L x 16" D (591 mm x 407 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.
- NSF/ANSI Standard 7 compliant for open food product.

ELECTRICAL

- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES

Upcharge and lead times may apply.

- 230 - 240V / 50 Hz.
- 6" (153 mm) standard legs.
- 6" (153 mm) seismic/flanged legs.
- 2 1/2" (64 mm) diameter castors.
- Barrel lock (factory installed).
- Single overshelf.
- Double overshelf.
- TUC-27 Stacking collar.
- 30" (762 mm) deep, 1/2" (13 mm) thick, white polyethylene cutting board. Requires "L" brackets.
- 30" (762 mm) deep, 1/2" (13 mm) thick, composite cutting board. Requires "L" brackets.
- Heavy duty, 16 gauge tops.
- Exterior rectangular digital temperature display (factory installed).
- ADA compliant models with 34" (864 mm) work surface height.

We Proudly Brew
STARBUCKS COFFEE

Verismo® 701

ESPRESSO MACHINE

Verismo® 701

Loaded with advanced features, yet easy to operate, this espresso machine allows even beginners to create perfect espresso beverages quickly and easily. More important, it brings a consistent cup quality to the espresso tradition.

Features and Benefits

Volume

- Up to 300 drinks per day (or about forty 16 fl oz lattes per hour).*
- Produces an espresso shot in approximately 30 seconds, satisfying your customers' demands for quick service.
- Steams 32 fl oz of milk in one minute.

Convenient and Easy to Use

- Automated with simple push-button operation.
- Each espresso shot is freshly ground, tamped and poured, eliminating variables and giving you consistently high-quality beverages (no manual tamping or knockout box).
- Equipped with internal grinders (no external grinders needed).
- Includes two whole-bean hoppers for storing regular and decaffeinated coffees.
- Thermostatic steam wand automatically shuts off at a preset temperature, eliminating scalded milk and guaranteeing beverage quality.
- Digital display prompts user during operation and helps reduce training time and errors.

Increase Potential Profits, Control Labor Costs and Reduce Waste

- Reduces training and enables operator to perform multiple tasks simultaneously.
- Reduces mess and cleanup time.
- Single-portion grinding helps eliminate waste and ensures freshness.
- At 17 in wide, the Verismo® 701 is half the size of a traditional two-group machine, leaving additional counterspace for Starbucks marketing and merchandise.
- The Verismo® 701 is backed by Starbucks Foodservice quality on-site training and toll-free service support.

*Drink volume is based on the first-year warranty guidelines.

We Proudly Brew
STARBUCKS COFFEE

Verismo® 701

ESPRESSO MACHINE

Verismo® 701

Verismo® 701 Specs

ELECTRICAL PLUG

L6-30P

Installation Requirements

Utilities

- 3/8 in water source with shutoff valve within 5 ft of espresso machine
- Shutoff must have 3/8 in female pipe outlet
- Drain must be available within 5 ft
- 20–50 PSI

Electrical

- Requires two-wire grounded service
- 220 volts; 30 amps
- (L1, L2, G)
- NEMA L6-30P receptacle required

Weight

- Shipping weight: 135 lb
- Installed weight (with water): 75 lb

Maintenance

- Push-button automatic cleaning takes minutes.
- Insert the cleaning tablet, and the machine automatically flushes all the internal components.
- Coffee grounds are contained in a special easy-to-clean bin.

Water System

Control of scale buildup in hard-water areas is a requirement of the Verismo® warranty program. Softened water will extend the life of any espresso equipment and reduce unscheduled maintenance. To simplify your selection, Starbucks can recommend a line of water softeners.

Verismo® 701 Features vs. Traditional Espresso Machines

	Verismo® 701 Espresso Machine	Traditional Espresso Machines
Grinders included	Yes	No
Automatic grind and dose	Yes	No
Thermostatically controlled steam wand	Yes	No
Estimated time to clean machine	10 minutes per day	20–30 minutes per day
Estimated operator training time	30 minutes or less	4 hours*

*Although training could be done in four hours, it may take up to two weeks to perfect drinks comparable to the Verismo® 701.

The Verismo® 701 espresso machine is ETL approved to UL® standards for electrical safety and NSF standards for sanitation.

For pricing, terms of warranty, installation and service, contact your Starbucks Foodservice representative.

Reach-In Solid Swing Door Freezer with Hydrocarbon Refrigerant

T-23F-HC

- ▶ True's solid door reach-in's are designed with enduring quality that protects your long term investment.
- ▶ Designed using the highest quality materials and components to provide the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.
- ▶ Extra large evaporator coil balanced with higher horsepower compressor and large condenser maintains -10°F (-23.3°C) cabinet temperatures. Ideally suited for both frozen foods and ice cream.
- ▶ Stainless steel solid door and front. The very finest stainless with higher tensile strength for fewer dents and scratches.
- ▶ Adjustable, heavy duty PVC coated shelves.
- ▶ Positive seal self-closing door. Lifetime guaranteed door hinges and torsion type closure system.
- ▶ Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

Bottom mounted units feature:

- ▶ "No stoop" lower shelf.
- ▶ Storage on top of cabinet.
- ▶ Compressor performs in coolest, most grease free area of kitchen.
- ▶ Easily accessible condenser coil for cleaning.

Model:
T-23F-HC

T-Series:
*Reach-In Solid Swing Door Freezer with
Hydrocarbon Refrigerant*

STANDARD FEATURES

DESIGN

- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydro carbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains -10°F (-23.3°C). Ideally suited for both frozen foods and ice cream.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Bottom mounted condensing unit positioned for easy cleaning. Compressor runs in coolest and most grease free area of the kitchen. Allows for storage area on top of unit.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

CABINET CONSTRUCTION

- Exterior - Stainless steel front. Anodized quality aluminum ends. Corrosion resistant GalFan coated steel back.

- Interior - attractive, NSF approved, clear coated aluminum liner. Stainless steel floor with coved corners.
- Insulation - entire cabinet structure and solid door are foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.
- Frame rail fitted with 4" (102 mm) diameter stem castors - locks provided on front set.

DOOR

- Stainless steel exterior with clear aluminum liner to match cabinet interior. Door extend full width of cabinet shell. Door lock standard.
- Lifetime guaranteed recessed door handle. Door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to ensure permanent attachment.
- Positive seal self-closing door. Lifetime guaranteed door hinges and torsion type closure system.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING

- Three (3) adjustable, heavy duty PVC coated wire shelves 22 7/8" L x 23 1/4" D (582 mm x 591 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

LIGHTING

- Interior lighting - safety shielded. Lights activated by rocker switch mounted above door.

MODEL FEATURES

- Exterior temperature display.
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Rear airflow guards prevent product from blocking optimal airflow.
- NSF/ANSI Standard 7 compliant for open food product.

ELECTRICAL

- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES

Upcharge and lead times may apply.

- 230 - 240V / 50 Hz.
- 6" (153 mm) standard legs.
- 6" (153 mm) seismic/flanged legs.
- Alternate door hinging (factory installed).
- Novelty baskets.
- Additional shelves.
- Half door bun tray racks. Each holds up to eleven 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- Full door bun tray rack. Holds up to twenty-two 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).

Ultra-Glo® Ceramic Infrared Strip Heaters

Models:

UGA-18, -24, -30, -36, -42, -48, -54, -60, -66, -72

UGAH-18, -24, -30, -36, -42, -48, -54, -60, -66, -72

UGAL-18, -24, -30, -36, -42, -48, -54, -60, -66, -72

UGAHL-18, -24, -30, -36, -42, -48, -54, -60, -66, -72

Hatco Ultra-Glo® Ceramic Strip Heaters provide the ultimate holding power. Increased height improves working clearances and the heat zone blankets the entire holding area. All models include adjustable angle brackets for mounting. Dual mounted strip heaters accommodate wider food holding areas.

Standard features

- Increased height provided with a ceramic heat source improves operational working clearances
- Adaptable to any location and configuration, including back- or front-of-the-house use, open kitchen concepts, or buffet lines
- Sturdy continuous extruded aluminum housings eliminate sagging
- Pre-focused heat pattern provides an increased pyramidal dimension, concentrating heat at the edges where heat loss is the greatest
- Available in widths from 18" to 72" (457 to 1829 mm), with or without lights
- Choice between Remote or Attached Control Enclosure with toggle switch, indicator light and wiring
- All models include adjustable angle brackets for mounting and leads with 3' (914 mm) conduit whip

Options (available at time of purchase only)

Housing

6" (153 mm) UGA, UGAH models 9" (229 mm) UGAL, UGAHL models

Designer Color or Gloss finish for Housing – choose below – Non -standard colors are non-returnable – Clear anodized aluminum finish standard

* Add 2-8 lbs. (1-3 kg.) to shipping weight depending on size of remote control enclosure. † Unit with multiple circuit connections. Each circuit may require a separate circuit breaker. NOTE: UGAHL models that have multiple voltages listed such as 120/208 or 120/240, have multiple internal circuits. For example, a 120/208V utilizes 120V for the light circuit and 208 volts for the heat circuit(s).

Mounting Requirements

Do not install Ultra-Glo® stripheaters above or around combustible surfaces. Discoloration or combustion could occur. Ultra-Glo strip heaters must be installed in non-combustible surroundings only.

Ultra-Glo® Warmers must be mounted at least 1" (25 mm) below shelf, and 3" (76 mm) from back wall.

Ultra-Glo® Standard Watt Warmers should be positioned 14" to 18" (356-457 mm) above a non-combustible surface.

Ultra-Glo® High Watt Warmers should be positioned 16" to 22" (406-559 mm) above a non-combustible surface.

PRODUCT SPECS - Ultra-Glo® Ceramic Infrared Strip Heaters

The Ceramic Infrared Strip Heater shall be an Ultra-Glo®, manufactured by the Hatco Corporation, Milwaukee, WI 53234 U.S.A.

The Foodwarmer shall be an Ultra-Glo Model ... , rated at ... watts, ... volts, single phase and be ... inches (millimeters) in overall width.

Dimensions

Models with Remote Control Enclosure, Toggle and Indicator Light:
18"-72"W x 6"D x 2.5"H (457-1829 x 152 x 64 mm).

Models with Attached Control Box Toggle and Indicator Light:
18"-72"W x 9.88"D x 2.5"H (457-1829 x 251 x 64 mm).

Remote Control Enclosure:
5.5", 9", 14", 16", or 20"W x 3"D x 2.5"H (140, 229, 356, 406, or 508 x 76 x 64 mm).

▲ Add 3" (76 mm) to depth when ordering units with lights.

The Ultra-Glo® shall consist of an aluminum housing, ceramic heating element, and angle brackets for mounting. Remote Control Enclosure is recommended. Mounting heights between 14" to 18" (356-457 mm) single standard (low) watt, 16" to 22" (406-559 mm) single high watt.

24/7 parts and service assistance (U.S. and Canada only)

Glass Door Merchandiser:

Swing Door Refrigerator with Hydrocarbon Refrigerant and LED Lighting

GDM-30-HC-LD

- ▶ The world's #1 manufacturer of glass door merchandisers.
- ▶ Four (4) adjustable, heavy duty PVC coated wire shelves. Four (4) chrome plated shelf clips included per shelf.
- ▶ Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- ▶ High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- ▶ Exterior - non-peel or chip black laminated vinyl; durable and permanent.
- ▶ Interior - attractive, NSF approved, white aluminum interior liner with stainless steel floor.
- ▶ Self closing doors. Positive seal, torsion type closure system.
- ▶ "Low-E", double pane thermal insulated glass door assemblies with extruded aluminum frames. The latest in energy efficient technology.
- ▶ Frame rail fitted with leg levelers and rollers.
- ▶ LED interior lighting provides more even lighting throughout the cabinet.
- ▶ Entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).

Bottom mounted units feature

- ▶ "No stoop" lower shelf to maximize product visibility.
- ▶ Storage on top of cabinet.
- ▶ Easily accessible condenser coil for cleaning.

Glass Door Merchandiser:
Swing Door Refrigerator with Hydrocarbon Refrigerant and LED Lighting

STANDARD FEATURES

DESIGN

- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, and lower utility costs in an attractive merchandiser that brilliantly displays packaged food and beverages.

REFRIGERATION SYSTEM

- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Bottom mounted condensing unit positioned for easy maintenance. "No stoop" lower shelf maximizes visibility by raising merchandised product to higher level.

CABINET CONSTRUCTION

- Exterior - non-peel or chip black laminated vinyl; durable and permanent.
- Interior - attractive, NSF approved, white aluminum liner with stainless steel floor.
- Insulation - entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.
- Frame rail fitted with leg levelers and rollers.

DOORS

- "Low-E", double pane thermal insulated glass door assemblies with mitered aluminum channel frames.
- Each door fitted with 12" (305 mm) long extruded handle.
- Self closing double swing door French gaskets allows access to the full shelf length when doors are open.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.

SHELVING

- Four (4) adjustable, heavy duty PVC coated wire shelves 26 5/16" L x 17 1/2" D (675 mm x 445 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

LIGHTING

- LED interior lighting provides more even lighting throughout the cabinet.

MODEL FEATURES

- Evaporator is epoxy coated to eliminate the potential of corrosion.
- See our website www.truemfg.com for latest color and sign offerings.
- Listed under NSF/ANSI Standard 7 for the storage and/or display of packaged or bottled product.

ELECTRICAL

- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES

Upcharge and lead times may apply.

EV9324-01

Insurice Single-I 2000 System

Delivers premium quality water for ice applications

Insurice Single-I 2000 System: EV9324-01

I 2000 Replacement Cartridge: EV9612-21

BENEFITS

Reduces water-related ice machine problems caused by scale build-up from dirt and dissolved minerals

Reduces chlorine taste and odor and other offensive contaminants

Self-contained scale inhibitor feed keeps ice machines functioning at full capacity

Reduces maintenance and service costs by reducing scale and clogging of distribution lines, evaporator plate and pump

Precoat submicron technology reduces dirt and particles as small as 1/2 micron in size

Reduces possible health contaminants such as asbestos fibers and Cryptosporidium and Giardia cysts

Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

NSF Certified under NSF/ANSI Standards 42 and 53

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating

Never use saddle valve for connection

Use 3/8" water line

Do not connect system to water-cooled condenser

Install vertically with cartridges hanging down and allow 2-1/2" clearance below the cartridge for easy cartridge replacement

Flush cartridges by running water through system for five minutes at full flow

OPERATION TIPS

Change cartridges on a regular 6 month preventative maintenance program

Change cartridges when capacity is reached or when pressure falls below 10 psi

Service flow rate must not exceed 1.67 gpm

Always flush the filter cartridge at time of installation and cartridge change

APPLICATION/SIZING

For ice machine applications

Most cubers up to 750 lbs./day

Most flakers up to 1,500 lbs./day

Insurice Single-I 2000 System

SPECIFICATIONS

Overall Dimensions:

29"H x 7"W x 7"D

Inlet connection: 3/8"

Outlet connection: 3/8"

Service Flow Rate:

Maximum 1.67 gpm (6.3 Lpm)

Pressure Requirements:

10 - 125 psi (0.7 - 8.6 bar), non-shock

Temperature: 35 - 100°F (2 - 38°C)

No electrical connection required

Shipping Weight: 6 lbs.

Operating Weight: 9 lbs.

The contaminants or other substances removed or reduced by this drinking water system are not necessarily in your water. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used with disinfected water that may contain filterable cysts.

WARRANTY

Everpure water treatment systems (excluding replaceable elements) are covered by a limited warranty against defects in material and workmanship for a period of five years after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Everpure will provide a copy of the warranty upon request.

System Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of:

Standard No. 42: Aesthetic Effects
Chemical Unit
Taste and Odor Reduction
Chlorine Reduction
Mechanical Filtration Unit
Particulate Reduction, Class I:
99.9+% reduction of particles
one-half micron and larger in size
Standard No. 53: Health Effects
Mechanical Filtration Unit
Turbidity Reduction
Cyst Reduction
Asbestos Reduction

SPEED QUEEN MULTI-HOUSING

QUANTUM® GOLD COIN DROP INSTALLED, PREP FOR COIN, PREP FOR CARD COMMERCIAL FRONT CONTROL FRONT LOAD WASHER

Built for Reliable Performance

Engineered and built like no other, the Speed Queen front load washer is designed to be everything people thought a washer couldn't be, beginning with its revolutionary suspension and sensing technology. This groundbreaking innovation manages and redistributes out-of-balance loads to deliver uninterrupted cycles, virtually eliminate vibration and operate so quietly neighboring residents won't even know it's running. It also touts an incredible 440 G-Force extraction speed to maximize moisture removal, reduce dry times and minimize utility costs. And as if that's not game-changing enough, this smooth-running, laundry-optimizing machine delivers increased water efficiency. It's everything you never knew it could be. Front controlled products have met every design standard to be 100% ADA compliant.

- Revolutionary balancing technology
- Industry leading 1200 RPM spin speed exerts 440 G-force extraction
- Integrated meter case
- Extra-wide 15.5" door opening and 180° door swing
- Rugged suspension system
- Easy-to-read digital display
- Large capacity meter case standard
- Multi-level vend pricing
- Individual cycle modifier keys
- Durable stainless steel tub standard
- Four-compartment soap dispenser
- Wash Alert™ capability

ENERGY STAR® Certified Washer

The cutting edge Quantum control system from Speed Queen gives you the freedom to manage laundry your way with the power to achieve unmatched levels of revenue. Quantum Gold provides users with additional cycle choices while offering new options to help lower operating costs and incorporates tools and options to increase revenue.

SPEED QUEEN MULTI-HOUSING

QUANTUM® GOLD COIN DROP INSTALLED, PREP FOR CARD COMMERCIAL FRONT CONTROL SINGLE DRYER

Built for Reliable Performance

Speed Queen's dryer, defined by its simplicity and its performance, provides everything you need to get the job done - and nothing you don't. Speed Queen's single load dryers combine heavy-duty construction with reliable operation proven to stand the test of time. They're designed with less moving parts for one reason: so you'll face fewer maintenance problems and less wear and tear down the road. Speed Queen's dryers provide the perfect balance of heat, airflow and tumble action for optimal performance and efficiency. Front load products have met every design standard to be 100% ADA compliant.

- Integrated meter case
- Industry's largest door opening 2.06 sq. ft. (1914 cm²)
- Quiet, efficient blower system
- Door is reversible for installation flexibility
- High efficiency exhaust blower with superior airflow 220 cfm (105 liters/sec)
- 100% serviceable from the front
- Space-saving narrow cabinet 26.875" (683 mm)
- Upfront lint filter easy to clean and secured
- Durable galvanized steel cylinder
- Large capacity meter case standard

The cutting edge Quantum control system from Speed Queen gives you the freedom to manage laundry your way with the power to achieve unmatched levels of revenue. Quantum Gold provides users with additional cycle choices while offering new options to help lower operating costs and incorporates tools and options to increase revenue.

SPEED QUEEN MULTI-HOUSING

QUANTUM® GOLD COIN DROP INSTALLED, PREP FOR CARD COMMERCIAL FRONT CONTROL SINGLE DRYER

Built for Reliable Performance

Speed Queen's dryer, defined by its simplicity and its performance, provides everything you need to get the job done - and nothing you don't. Speed Queen's single load dryers combine heavy-duty construction with reliable operation proven to stand the test of time. They're designed with less moving parts for one reason: so you'll face fewer maintenance problems and less wear and tear down the road. Speed Queen's dryers provide the perfect balance of heat, airflow and tumble action for optimal performance and efficiency. Front load products have met every design standard to be 100% ADA compliant.

- Integrated meter case
- Industry's largest door opening 2.06 sq. ft. (1914 cm²)
- Quiet, efficient blower system
- Door is reversible for installation flexibility
- High efficiency exhaust blower with superior airflow 220 cfm (105 liters/sec)
- 100% serviceable from the front
- Space-saving narrow cabinet 26.875" (683 mm)
- Upfront lint filter easy to clean and secured
- Durable galvanized steel cylinder
- Large capacity meter case standard

The cutting edge Quantum control system from Speed Queen gives you the freedom to manage laundry your way with the power to achieve unmatched levels of revenue. Quantum Gold provides users with additional cycle choices while offering new options to help lower operating costs and incorporates tools and options to increase revenue.
